NUMERICAL, SYMBOLIC AND STATISTICAL COMPUTING FOR CHEMICAL ENGINEERS USING MATLAB Ghosh, Pallab, 2018-09-01 Numerical analytical and statistical computations are routine affairs for chemical engineers. They usually prefer a single software to solve their computational problems and at present MATLAB has emerged as a powerful computational language which is preferably used for this purpose due to its built in functions and toolboxes. Considering the needs and convenience of the students the author has made an attempt to write this book which explains the various concepts of MATLAB in a systematic way and makes its readers proficient in using MATLAB for computing. It mainly focuses on the applications of MATLAB rather than its use in programming basic numerical algorithms. Commencing with the introduction to MATLAB the text covers vector and matrix computations solution of linear and non linear equations differentiation and integration and solution of ordinary and partial differential equations. Next analytical computations using the Symbolic Math Toolbox and statistical computations using the Statistics and Machine Learning Toolbox are explained. Finally the book describes various curve fitting techniques using the Curve Fitting Toolbox. Inclusion of all these advanced level topics in the book stands it out from the rest.

KEY FEATURES

- Numerous worked out examples to enable the readers understand the steps involved in solving the chemical engineering problems.
- MATLAB codes to explain the computational techniques.
- Several snapshots to help the readers understand the step by step procedures of using the toolboxes.
- Chapter end exercises including short answer questions and numerical problems.
- Appendix comprising the definitions of some important and special matrices.
- Supplemented with Solutions Manual containing complete detailed solutions to the unsolved analytical problems.
- Accessibility of selected colour figures including screenshots and results outputs of the programs cited in the text at www.phindia.com.
