Property, Plant and Equipment

Review Questions

QUESTION 1

- (a) The conceptual framework outlines the concepts that underlie the presentation of financial statements for users of the accounting system. According to the framework, an asset is an item (i) arising from past transactions, (ii) controlled by the entity, and (iii) that gives rise to future economic benefits for the entity. From this definition, it appears that all of the items mentioned: (i) air traffic control system; (ii) grand power units; (iii) tugs; (iv) tractors; (v) dollies; (vi) baggage sorting system, and (vii) vacuum cleaners, are possessed by the company, Ground Global Bhd. Thus, these items meet the criteria since they are previously acquired, are in the control of the company and benefit the company through their use in the company's normal business operations.
- Special attention, though, is with regard to the vacuum cleaners costing is RM300 each and useful life is only 5 years. Although the number of vacuum cleaners is not specifically mentioned, it appears that this amount is immaterial in comparison with other items. The depreciation, if straight line depreciation is used, is only RM60 (RM300/5 years) for each unit of vacuum cleaner. When information is presented to the users, it is vital to ensure that the information meets the materiality criteria as disclosure of the item would significantly affect the decisions of the users. In this case, a vacuum cleaner with a cost of RM300 would very likely be an insignificant item in a large company like Ground Global Bhd. Based on this reasoning, it is more appropriate to classify all the items above as assets, except the vacuum cleaners.
- (b) According to MFRS 116, a property, plant and equipment is an item that: (i) is used in the production of goods or services or for administrative purposes, and (ii) is expected to be used for more than one accounting period. Except for the vacuum cleaners which are not regarded as an asset, items (i) to (vi) are all used by Ground Global Bhd and their useful lives are more than a year. Therefore, items (i) to (vi) meet the definition of property, plant and equipment.
- (c) The installation costs of the air traffic control system and baggage sorting system are necessary before the items can readily be used for operations. The costs of RM35,000 is therefore necessary to bring these assets to its present working conditions. Hence, in accordance with Paragraph 16 of MFRS 116, the costs of RM35,000 shall be included in the costs of both the air traffic control system and baggage sorting system.
- (d) The upgrading of radar system to satellite system for the air traffic control system requires an installation of the new satellite system and dismantling of the currently used radar system. This is because it is clear that both systems could not be used simultaneously in the air traffic control
