The Changing Face of World Cities Maurice Crul, John Mollenkopf, 2012-08-01 A seismic population shift is taking place as many formerly racially homogeneous cities in the West attract a diverse influx of newcomers seeking economic and social advancement In *The Changing Face of World Cities* a distinguished group of immigration experts presents the first systematic data based comparison of the lives of young adult children of immigrants growing up in seventeen big cities of Western Europe and the United States Drawing on a comprehensive set of surveys this important book brings together new evidence about the international immigrant experience and provides far reaching lessons for devising more effective public policies *The Changing Face of World Cities* pairs European and American researchers to explore how youths of immigrant origin negotiate educational systems labor markets gender neighborhoods citizenship and identity on both sides of the Atlantic Maurice Crul and his co authors compare the educational trajectories of second generation Mexicans in Los Angeles with second generation Turks in Western European cities In the United States uneven school quality in disadvantaged immigrant neighborhoods and the high cost of college are the main barriers to educational advancement while in some European countries rigid early selection sorts many students off the college track and into dead end jobs Liza Reisel Laurence Lessard Phillips and Phil Kasinitz find that while more young members of the second generation are employed in the United States than in Europe they are also likely to hold low paying jobs that barely lift them out of poverty In Europe where immigrant youth suffer from higher unemployment the embattled European welfare system still yields them a higher standard of living than many of their American counterparts Turning to issues of identity and belonging Jens Schneider Leo Chavez Louis DeSipio and Mary Waters find that it is far easier for the children of Dominican or Mexican immigrants to identify as American in part because the United States takes hyphenated identities for granted In Europe religious bias against Islam makes it hard for young people of Turkish origin to identify strongly as German French or Swedish Editors Maurice Crul and John Mollenkopf conclude that despite the barriers these youngsters encounter on both continents they are making real progress relative to their parents and are beginning to close the gap with the native born *The Changing Face of World Cities* goes well beyond existing immigration literature focused on the United States experience

to show that national policies on each side of the Atlantic can be enriched by lessons from the other The Changing Face of World Cities will be vital reading for anyone interested in the young people who will shape the future of our increasingly interconnected global economy

Generating Jobs Richard B. Freeman, Peter Gottschalk, 1998-02-26 The American economy is in danger of leaving its low skilled workers behind In the last two decades the wages and employment levels of the least educated and experienced workers have fallen disastrously Where willing workers once found ready employment at reasonable wages our computerized service oriented economy demands workers who can read and write master technology deal with customers and much else Improved education and training will alleviate this problem in the long run but educating the new workforce will take a substantial national investment over many years In the meantime we face increasingly acute questions about how to include low skill workers in today s economy Generating Jobs takes a hard look at these questions and asks whether anything can be done to improve the lot of low skilled workers by intervening in the labor market on their behalf These micro demand side policies seek to improve wages and employment levels either by lowering the costs of hiring low skilled workers through employer subsidies or by raising wage levels benefit levels or hours of employment or by providing employment via government jobs Although these policies are not currently popular in the U S they have long been used in many countries Generating Jobs provides a clear eyed assessment of this history and asks if any of these policies might be applicable to the current problems of low skilled workers in the United States The results are surprising Several recently touted panaceas turn out to be costly and ineffective in the American labor market Enterprise zones for instance are an expensive way of moving jobs into areas of high unemployment costing as much as 60 000 per job Similarly job sharing which has had uneven success in Europe turns out to be ill suited to conditions in the U S where wages are relatively low and workers need to work long hours to maintain income On the other hand a number of older less flashy policies turn out to have real if modest benefits Wage subsidies have increased employment among qualifying workers and public employment policies can increase the number of workers from targeted groups working during the program While acknowledging that many solutions are counterproductive this definitive review of active labor market policies shows that many programs can offer real help More than any rhetoric Generating Jobs is the best guide to future action and a serious response to those who claim that nothing can be done

White Space, Black Hood Sheryll Cashin, 2021-09-14 A 2021 C Wright Mills Award Finalist Shows how government created ghettos and affluent white space and entrenched a system of American residential caste that is the linchpin of US inequality and issues a call for abolition The iconic Black hood like slavery and Jim Crow is a peculiar American institution animated by the ideology of white supremacy Politicians and people of all colors propagated ghetto myths to justify racist policies that concentrated poverty in the hood and created high opportunity white spaces In White Space Black Hood Sheryll Cashin traces the history of anti Black residential caste boundary maintenance opportunity hoarding and stereotype driven surveillance and unpacks its current legacy so we can begin the work to dismantle the

structures and policies that undermine Black lives Drawing on nearly 2 decades of research in cities including Baltimore St Louis Chicago New York and Cleveland Cashin traces the processes of residential caste as it relates to housing policing schools and transportation She contends that geography is now central to American caste Poverty free havens and poverty dense hoods would not exist if the state had not designed constructed and maintained this physical racial order Cashin calls for abolition of these state sanctioned processes The ultimate goal is to change the lens through which society sees residents of poor Black neighborhoods from presumed thug to presumed citizen and to transform the relationship of the state with these neighborhoods from punitive to caring She calls for investment in a new infrastructure of opportunity in poor Black neighborhoods including richly resourced schools and neighborhood centers public transit Peacemaker Fellowships universal basic incomes housing choice vouchers for residents and mandatory inclusive housing elsewhere Deeply researched and sharply written *White Space Black Hood* is a call to action for repairing what white supremacy still breaks Includes historical photos maps and charts that illuminate the history of residential segregation as an institution and a tactic of racial oppression

The Affordable Housing Reader Elizabeth J. Mueller, J. Rosie Tighe, 2013-03-05 The Affordable Housing Reader brings together classic works and contemporary writing on the themes and debates that have animated the field of affordable housing policy as well as the challenges in achieving the goals of policy on the ground The Reader aimed at professors students and researchers provides an overview of the literature on housing policy and planning that is both comprehensive and interdisciplinary It is particularly suited for graduate and undergraduate courses on housing policy offered to students of public policy and city planning The Reader is structured around the key debates in affordable housing ranging from the conflicting motivations for housing policy through analysis of the causes of and solutions to housing problems to concerns about gentrification and housing and race Each debate is contextualized in an introductory essay by the editors and illustrated with a range of texts and articles Elizabeth Mueller and Rosie Tighe have brought together for the first time into a single volume the best and most influential writings on housing and its importance for planners and policy makers
