Data-Driven Personas Bernard J. Jansen, Joni Salminen, Soon-gyo Jung, Kathleen Guan, 2022-05-31 Data driven personas are a significant advancement in the fields of human centered informatics and human computer interaction Data driven personas enhance user understanding by combining the empathy inherent with personas with the rationality inherent in analytics using computational methods Via the employment of these computational methods the data driven persona method permits the use of large scale user data which is a novel advancement in persona creation A common approach for increasing stakeholder engagement about audiences customers or users persona creation remained relatively unchanged for several decades However the availability of digital user data data science algorithms and easy access to analytics platforms provide avenues and opportunities to enhance personas from often sketchy representations of user segments to precise actionable interactive decision making tools data driven personas Using the data driven approach the persona profile can serve as an interface to a fully functional analytics system that can present user representation at various levels of information granularity for more task aligned user insights We trace the techniques that have enabled the development of data driven personas and then conceptually frame how one can leverage data driven personas as tools for both empathizing with and understanding of users Presenting a conceptual framework consisting of a persona benefits b analytics benefits and

c decision making outcomes we illustrate applying this framework via practical use cases in areas of system design digital marketing and content creation to demonstrate the application of data driven personas in practical applied situations We then present an overview of a fully functional data driven persona system as an example of multi level information aggregation needed for decision making about users We demonstrate that data driven personas systems can provide critical empathetic and user understanding functionalities for anyone needing such insights

Personas - User Focused Design

Lene Nielsen, 2012-08-11 People relate to other people not to simplified types or segments This is the concept that underpins this book Personas a user centered design methodology covers topics from interaction design within IT through to issues surrounding product design communication and marketing Project developers need to understand how users approach their products from the product s infancy and regardless of what the product might be Developers should be able to describe the user of the product via vivid depictions as if they with their different attitudes desires and habits were already using the product In doing so they can more clearly formulate how to turn the product s potential into reality With contributions from professionals from Australia Brazil Finland Japan Russia and the UK presenting real world examples of persona method this book will provide readers with valuable insights into this exciting research area The inspiration to create user descriptions includes character driven narratives and the film Thelma Louise is analyzed in order to understand how the development process can also be an engaging story in various professional contexts With a solid foundation in her own research at the IT University of Copenhagen and more than five years of experience in solving problems for businesses Lene Nielsen is Denmark s leading expert in the persona method She has a PhD in personas and scenarios and through her research and practical experiences she has developed her own approach to the method 10 Steps to Personas Personas User Focused Design presents a step by step methodology of personas which will be of interest to developers of IT communications solutions and innovative products
