**The Noah Myth in Twenty-first-century Cli-fi Novels** Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene With the rise of concern about global warming in recent years climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research Flood narratives have become a subsection of cli fi in their own right This book proposes new readings of four recent rewritings of the Noah myth *Odds Against Tomorrow* by Nathaniel Rich Margaret Atwood's *Maddaddam* trilogy *When the Floods Came* by Clare Morrall and *The Flood* by Maggie Gee Helen E Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years acknowledging important contributions from critics including Adam Trexler Adeline Johns Putra and Astrid Bracke However her book's strength is that it takes a new approach going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene

**The Ex-Human** Michael

Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare science fiction authors have conjured apocalyptic scenarios of human extinction Can such gloomy fates help us make sense of our contemporary crises How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape What other possible futures do narratives of the end of humanity allow us to imagine Michael B rub explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of Homo sapiens In a lively conversational style he considers novels by writers including Ursula K Le Guin Margaret Atwood Liu Cixin Philip K Dick and Octavia Butler as well as films that feature hostile artificial intelligence such as 2001 A Space Odyssey Blade Runner and the Terminator and Matrix franchises B rub argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human Though framed by the possibility of human extinction they are driven by a vision of the ex human a desire to imagine that another species is possible For all science fiction readers

worried about the fate of humanity The Ex Human is an entertaining yet sobering account of how key novels and films envision the world without us

*Understanding Public Debates* Jens Martin Gurr, 2024-06-20 By historicizing and contextualizing them through readings of carefully selected literary texts literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today whether on different conceptions of liberty identity politics historical commemoration challenges of globalization or responses to climate change Understanding Public Debates presents case studies including Milton s Paradise Lost P B Shelley s 1820 Reform essay Philip Roth s The Human Stain the songwriting of Neil Young and Edward Young s 1720s Sea Odes recent climate fiction as well as non literary conflict narratives Rather than mining texts for arguments for or against certain positions this book is interested in how texts stage these debates by means of multiple perspectives narrative situations or ambiguities By suggesting how educators might use literary texts as conversation starters for more rational debates the volume also contributes to Public Literary Studies Three important fields are here brought together 1 the study of societal debates and conflicts and the ways in which they challenge pluralist societies 2 explorations of the societal functions of literature and of non literary narratives and 3 discussions of the role and functions of literary studies The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates

**The Democracy of Suffering** Todd Dufresne, 2019-09-12 In The Democracy of Suffering philosopher Todd Dufresne provides a strikingly original exploration of the past present and future of this epoch the Anthropocene demonstrating how the twin crises of reason and capital have dramatically remade the essential conditions for

life itself Images cartoons artworks and quotes pulled from literary and popular culture supplement this engaging and unorthodox look into where we stand amidst the ravages of climate change and capitalist economics With humour passion and erudition Dufresne diagnoses a frightening new reality and proposes a way forward arguing that our serial experiences of catastrophic climate change herald an intellectual and moral awakening one that lays the groundwork albeit at the last possible moment for a future beyond individualism hate and greed That future is unapologetically collective It begins with a shift in human consciousness with philosophy in its broadest sense and extends to a reengagement with our greatest ideals of economic social and political justice for all But this collective future Dufresne argues is either now or never Uncovering how we got into this mess and how if at all we get out of it *The Democracy of Suffering* is a flicker of light or perhaps a scream in the face of human extinction and the end of civilization
