The Non-Technical Founder Josh MacDonald, 2018-04-03 Everyone has an idea that they think is the next big thing. The problem is it's probably an app or software idea and most people probably don't know how to code and their record for managing programmers is little to none. Even if they do know how to code they're not quite sure how to get their first one thousand customers. The Non-Technical Founder walks readers through the stages of validating whether their next big thing is good, bringing the idea to life and getting those first customers. Film Authorship in Contemporary Transmedia Culture

Wikanda Promkhuntong, 2025-10-01 Film Authorship in Contemporary Transmedia Culture The Paratextual Lives of Asian Auteurs examines film authorship in the transmedia era whereby film directors have become public figures through a wide range of textual material and performative practices. The book draws on the notion of paratext and its related term palimpsest to bring forth the idea of self-reflexive authorship as a method of examining the mediated past, present and afterlife of East Asian filmmakers. The first part of the book pays attention to materials surrounding film festivals, multi-platform distribution and cinephile fan creative practices which have been created, rewritten and shared to foster and problematize the reputations of selected filmmakers. The second part examines alternative modes of self-projections and creative productions that address the filmmakers' sense of selves and relations with the industry and the public. Across different chapters, discourses surrounding film authorship and East Asian cinema are revisited and expanded to highlight its multiple histories and possible futures. **Social Computing and Social Media** Adela Coman, Simona

The Primer of Principles, the Organic Maxims of All Systems of Procedure William Taylor Hughes, 1931 Rise of the Far Right Melody Devries, Judith Bessant, Rob Watts, 2021-07-29 After decades on the social and political margins, far-right groups and movements are enjoying increasing success and even claiming a place in mainstream electoral politics in many Western political systems. Research shows that new media like Twitter, YouTube and community sites like 4chan and Reddit are increasingly involved with the mobilization of popular support for far-right electoral campaigns and even organized political violence. These technologies, including other social media, discussion websites, certain online games, chat servers, talk radio, cable news and print media, are making contemporary far-right ideologies possible in diverse ways, altering methods of

recruitment to the extent that they become unrecognizable from far right movements of the past and thus more dangerous. The results of these new technological processes can be seen in the increasing normalization of far right values within mainstream culture, politics and media ecosystems within countries from the United States, Britain, Australia, Germany and Hungary. This book brings together recent academic research exploring how far right groups use new media to recruit followers to extremist beliefs and mobilize political action. In doing so, the book reveals the complex ways that evolving technologies are used both purposively, subtly and in some cases incidentally to recruit and mobilize far right support.

Understanding Reddit Elliot T. Panek, 2021-12-24 This book offers a comprehensive scholarly overview of Reddit, one of the most popular and least studied social platforms of the early 21st century. The book inspires new ways of thinking about Reddit, considering it from multiple perspectives through a historical lens as a site where identity is forged, as a democracy, as a community and as a news aggregator and distributor. By bringing theories from computer-mediated communication, communication studies and sociology to bear on original large-scale observational analyses of Reddit's communities, this book provides a uniquely comprehensive overview of the platform's first 15 years. *Understanding Reddit* will help us make sense of how rapidly growing communities function in an era of mass online anonymity. Serving both as a primer on how social behavior on Reddit plays out and as a way of locating it within multiple theoretical traditions, the book will offer important insights to scholars and students in the disciplines of communication, media studies, information science, internet and emerging media studies and sociology. Gaming Democracy Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In Gaming Democracy Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions Using the lens of play and game studies as well as the concept of metagaming Gaming Democracy is a novel contribution to our understanding of online platforms and far right political activism
