The Imagined Arctic in Speculative Fiction Maria Lindgren Leavenworth, 2023-07-31 The Imagined Arctic in Speculative Fiction explores the ways in which the Arctic is imagined and what function it is made to serve in a selection of speculative fictions non mimetic works that start from the implied question What if Spanning slightly more than two centuries of speculative fiction from the starting point in Mary Shelley s 1818 Frankenstein to contemporary works that engage with the vast ramifications of anthropogenic climate change analyses demonstrate how Arctic discourses are supported or subverted and how new Arctics are added to the textual tradition To illuminate wider lines of inquiry informing the way the world is envisioned humanity s place and function in it and more than human entanglements analyses focus on the function of the actual Arctic and how this function impacts and is impacted by speculative elements With effects of climate change training the global eye on the Arctic and as debates around future northern cultural economic and environmental sustainability intensify there is a need for a deepened understanding of the discourses that have constructed and are constructing the Arctic A careful mapping and serious consideration of both past and contemporary speculative visions thus illuminate the role the Arctic has played and may come to play in a diverse set of practices and fields

Post-Apocalyptic Cultures Julia Urabayen, Jorge León Casero, 2024-03-19 This book advocates for the necessity of recovering the value of utopias as political projects that open new channels of action The criticism of modern political utopias is based on the supposed impossibility of creating for the future because there is no longer a future apocalyptic ideology However this edited collection seeks to show that the post apocalyptic world in which we live entails a renewed freedom of design for the radical reorganization of institutions Post apocalyptic cultures are not obligated to follow the capitalist anthropocentric correlationist and sovereign modes of the old political project of emancipation the Western enlightenment that has started to collapse With this in mind this book is divided into four sections dedicated to the main themes from which to rethink the projects of political emancipation that are possible nowadays technopolitics posthumanist biopolitics non western politics and the crossover between arts and politics

The Lady of Rapture Sarah Roughley, 2025-04-29 Penny Dreadful meets The Gilded Wolves in this breathtaking finale to the young adult historical fantasy Bones of Ruin trilogy For years the elite secret society called the Enlightenment Committee has waited for the apocalyptic force known as Hiva to destroy the world as it has so many times before What the Committee didn t know however was that Hiva wasn t an event it was a person Iris Marlow An African tightrope dancer with no memories of her past A girl who cannot die At least she couldn t die Until her own friends discovered her one weakness and murdered her once and for all The world ending threat she posed should be gone too but there s one more Hiva out there and unlike Iris this one has no love for humanity In her absence this Hiva has taken it upon himself to judge if humanity deserves to live But when it comes to Hivas the judgment is always the same The ending is always total destruction And while Iris is dead she s not gone and after the betrayal that

ended her life as Iris she is now out for revenge The world s days are numbered The Cataclysm has begun **Digital Games eBook** GURMEET SINGH DANG, Post Apocalyptic Comics Ethan Parker, AI, 2025-03-10 Post Apocalyptic Comics explores our fascination with dystopian societies and survival in the face of societal collapse as portrayed in comics and graphic novels The book examines how these narratives often dismissed as mere entertainment actually reflect our deepest cultural anxieties Comics offer a unique lens through which to examine human resilience and the moral dilemmas that arise when civilization crumbles providing a powerful commentary on our values and fears One intriguing facet is the evolution of survival strategies depicted ranging from lone wolf approaches to collaborative community building after catastrophic events The study analyzes the representation of dystopian societies and the power structures they create It also considers how these narratives function as cultural barometers reflecting anxieties related to nuclear proliferation environmental degradation and global pandemics Using a diverse range of comic books and graphic novels and balancing formal analysis with engaging writing the book progresses from introducing core concepts to exploring survival strategies dystopian representations and the ethical quandaries faced by characters Ultimately the book aims to provide a deeper understanding of the cultural significance of post apocalyptic comics and their relevance to contemporary issues **Cowboy Apocalypse** Rachel Wagner, 2025-02-25 The cowboy apocalypse is a pervasive story replayed in books film television videogames and live action role playing which blends the mythology of the American Western with doomsday prophecies in which the good guy with the gun is the messiah and God has nothing to do with the apocalypse **Culture, Cognition, Narrative** Vera Nünning, Ansgar Nünning, 2025-11-14 Although it is well known that narrative impacts our modes of assessing and interpreting the world as well as the creation of cultural identities and cultural communities there is little research on the way in which cognition culture and narratives intersect Cultural narratology usually focuses on the relation between culture and narrative while cognitive narratology explores the relation between cognition and narrative However the three concepts reciprocally influence each other narratives shape cognition just as cognitive frames and processes shape narratives Similarly the culture we belong to informs our cognitive processes and the way we perceive interpret and react to our environment Culture and narrative also impact each other in myriad ways Narratives are therefore at the centre of this volume and each chapter deals with narrative either as a cognitive or performative tool relating it to either cognition or culture or to both The volume also explores social practices of real world storytelling for instance in discourses on migration and the cognitive dimension of cultures that narratives provide access to The latter includes shared self concepts schemata and cultural models This interdisciplinary volume builds conceptual bridges between cultural studies cognitive theory and narrative theory The Last of Us and Philosophy Charles Joshua Horn, 2024-10-08 Did Joel do the right thing when he saved Ellie Are those infected by the Cordyceps conscious Are communities necessary for human survival and flourishing Should Ellie forgive Joel Is Abby s revenge morally justified Is Ellie s The Last of Us franchise includes two of the best video games ever created and the

Local Natures, Global Responsibilities , 2010-01-01 In the New Literatures in English nature has long been a paramount issue the environmental devastation caused by colonialism has left its legacy with particularly disastrous consequences for the most vulnerable parts of the world At the same time social and cultural transformations have altered representations of nature in postcolonial cultures and literatures It is this shift of emphasis towards the ecological that is addressed by this volume A fast expanding field ecocriticism covers a wide range of theories

and areas of interest particularly the relationship between literature and other texts and the environment Rather than adopting a rigid agenda the interpretations presented involve ecocritical perspectives that can be applied most fruitfully to literary and non literary texts Some are more general holistic approaches literature and other cultural forms are a living organism part of an intellectual ecosystem implemented and sustained by the interactions between the natural world both human and non human and its cultural representations Nature itself is a new interpretative category in line with other paradigms such as race class gender and identity A wide range of genres are covered from novels or films in which nature features as the main topic or protagonist to those with an ecocritical agenda as in dystopian literature Other concerns are nature as a cultural construct gendered natures and the city country dichotomy The texts treated challenge traditional Western dualisms human animal man nature woman man While such global phenomena as media old or new tourism and catastrophes permeate many of these texts there is also a dual focus on nature as the inexplicable elusive Other and the need for human agency and global responsibility
