

BENEFITS:

SmartPlant Foundation is an engineering information management solution that:

- Enables seamless collaboration across the value chain and between facility information systems.
- Offers accurate, appropriate data for rapid decision support in time-critical situations and helps to manage inconsistencies and reduce errors.
- Provides a high-integrity and secure repository for project and facility information and documentation with auditable traceability.
- Improves quality of engineering and technical data handover from execution into operations.
- Enables users to find information quickly and easily through many different routes (query, drill-down, navigation, full text retrieval) based on the knowledge they have.
- Promotes client and regulator remote review through a portal to minimize plant startup time and ensure continued operations.
- Provides proven Engineering Content Management (EngCM), including document and drawing management and control, list and sheet development, and exchange with suppliers and contractors.
- Provides unparalleled application integration to increase quality while reducing schedule.
- Reduces cost and errors associated with multiple information sources by eliminating the boundaries between them. SmartPlant Foundation is the single source of access to the engineering truth about a plant – its structure, tags, equipment, data, and documents.

SMARTPLANT® FOUNDATION

Visualizing Key Information from Complex Data Sources

Information is the basis upon which real-time decisions are made. Engineering information is abundant, dynamic, and complex. Keeping this information current, synchronized, and readily accessible throughout the life cycle is the challenge – whether it is used concurrently by multiple companies during plant design, by engineers during plant construction and commissioning, or by maintenance and operations workers on the plant floor.

SmartPlant® Foundation, the Intergraph® total solution for plant information management, ensures secure access to plant information, including engineering designs, vendor data, purchase orders, RFQs, specification sheets, and all ancillary documents to support the plant life cycle. SmartPlant Foundation enables the user to make rapid and accurate design and operational decisions from large and complex data sets. "Business Intelligence" provides a collection of key performance indicators, reports, and metrics in a contained user experience without the need to learn a complex data mining mechanism.

Powering the Intergraph information management solutions, SmartPlant Foundation is the world's most proven and widely deployed, industry-standard, engineering information management solution in the process, power, and marine industries. SmartPlant Foundation provides a modular set of user experiences based on typical work processes to ensure that valid, consistent, and high-quality engineering data is shared between applications and delivered to users when and where they need it.

Information Integrity

The engineering design basis needs to be consistent and highly accurate on three fronts:

1. The physical asset information (what is there).
2. Logical and functional information (what was designed to be there).
3. Regulatory and safety imperatives (what is required to be there).

These are the pivotal tenets of engineering integrity.

SmartPlant Foundation is a complementary offering to Intergraph's industry-leading design tools, acting as a data exchange hub between Intergraph Smart™ 3D, SmartPlant P&ID, SmartPlant Instrumentation, SmartPlant Electrical, SmartPlant Materials, and PDS®.
