The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while the chart shows an increasing trend for all topics as the subreddit grows, it particularly highlights Topic 4 (Mental Health), becoming the most prominent over time. This aligns with the broader societal focus on mental health awareness. Additionally, the chart shows the relative prevalence of each topic over time. Among the top topics, we find a mix of academic concerns (e.g., academic pressure, university applications), social aspects (e.g., finding friends, loneliness), and personal well-being (e.g., mental health, housing). First, the prevalence of topics such as job, university choice and applications, accommodation and finance highlight the practical challenges that students face in their university journey. Interestingly, students use such social media platforms as an avenue of seeking help and advice from other UK university students who have experienced similar concerns. These discussions not only provide valuable peer-to-peer support but also offer insights into the common struggles and decision-making processes of students.

Secondly, the prevalence of topics related to mental health and well-being (e.g., mental health, stress, anxiety, self-harm, depression) is a significant finding. This suggests that students are increasingly aware of their mental health and seeking support. The chart also shows a mix of topics related to social life, relationships, and travel, indicating that students are also interested in these aspects of their university experience.
