Smart Sanctions Targeting Economic Statecraft:

Smart Sanctions David Cortright, George A. Lopez, 2002 *Smart Sanctions* explores the emerging concept of targeted sanctions and provides a comprehensive framework for new sanctions strategies for the 21st century. It includes essays by experts and analysts from the United Nations community, the European Union, the United States Government, and the academic community. Visit our website for sample chapters. **Targeted Sanctions** Thomas J. Biersteker, Sue E.

Eckert, Marcos Tourinho, 2016-03-08 International sanctions have become the instrument of choice for policymakers dealing with a variety of different challenges to international peace and security. This is the first comprehensive and systematic analysis of all the targeted sanctions regimes imposed by the United Nations since the end of the Cold War. Drawing on the collaboration of more than fifty scholars and policy practitioners from across the globe, the Targeted Sanctions Consortium the book analyzes two new databases, one qualitative and one quantitative, to assess the different purposes of UN targeted sanctions, the Security Council dynamics behind their design, the relationship of sanctions with other policy instruments, implementation challenges, diverse impacts, unintended consequences, policy effectiveness, and institutional learning within the UN. The book is organized around comparisons across cases rather than country case studies and introduces two analytical innovations: case episodes within country sanctions regimes and systematic differentiation among different purposes of sanctions. [Handbook of Defense Economics](#) Todd Sandler, Keith Hartley, 2007-04-12

The second volume of the *Handbook of Defense Economics* addresses defense needs, practices, threats, and policies in the modern era of globalization. This new era concerns the enhanced cross-border flows of all kinds, e.g., capital and labor flows, revolutionary rhetoric, guerrillas, and terrorists, including the spillovers of benefits and costs associated with public goods and transnational externalities, i.e., uncompensated interdependencies affecting two or more nations. These ever-increasing flows mean that military armaments and armies are less able to keep out security threats. Thus, novel defense and security barriers are needed to protect borders that are porous to terrorists, pollutants, political upheavals, and conflicts. Even increased trade and financial flows imply novel security challenges and defenses. Globalization also underscores the importance of a new set of institutions, e.g., the European Union and global governance networks and agents, e.g., nongovernmental organizations and partnerships. This volume addresses the security challenges in this age of globalization where conflicts involve novel tactics, new technologies, asymmetric warfare, different venues, and frightening weapons. Volume 2 contains topics not covered in volume 1, i.e., civil wars, peacekeeping, economic sanctions, the econometrics of arms races, conversion, peace economics, and the interface of trade, peace, and democracy. Volume 2 also revisits topics from volume 1 where there has been a significant advancement of knowledge, i.e., conflict analysis, terrorism, arms races, arms trade, military manpower, and arms industries. All of the main securities concerns of today are analyzed. Chapters are written by the leading contributors in the topic areas. Up-to-date surveys on the pressing defense issues, theoretical, empirical, and policy issues. Coverage of theoretical and empirical studies.

of terrorism Contributions by the leading researchers in the field of defense economics **Targeting Peace** Mikael Eriksson,2016-04-01 In recent years the international community has increasingly come to abandon the use of comprehensive sanctions in favour of targeted sanctions Unlike adopting a coercive strategy on entire states actors like the United Nations UN and the European Union EU have come to resort to measures that are aimed at individuals groups and government members Targeted sanctions involve adopting measures such as asset freezes travel bans commodity sanctions as well as arms embargoes Eriksson argues that recent changes in the practice of sanctions from comprehensive to targeted sanctions requires a new way of understanding international sanctions practice Not only do we need to rethink our methodology to assess recent practice but also to rethink the very theory of sanctions This valuable new perspective provides recent thinking on targeted sanctions trends in practice and unique case studies for evaluation Based on substantial research this is a must read for students scholars and practitioners interested in international politics Rethinking Security Governance Christopher Daase,Cornelius Friesendorf,2010-05-04 This book explores the unintended consequences of security governance actions and explores how their effects can be limited Security governance describes new modes of security policy that differ from traditional approaches to national and international security While traditional security policy used to be the exclusive domain of states and aimed at military defense security governance is performed by multiple actors and is intended to create a global environment of security for states social groups and individuals By pooling the strength and expertise of states international organizations and private actors security governance is seen to provide more effective and efficient means to cope with today s security risks Generally security governance is assumed to be a good thing and the most appropriate way of coping with contemporary security problems This assumption has led scholars to neglect an important phenomenon unintended consequences While unintended consequences do not need to be negative often they are The CIA term blowback for example refers to the phenomenon that a long nurtured group may turn against its sponsor The rise of al Qaeda which had benefited from US Cold War policies is only one example Raising awareness about unwanted and even paradoxical policy outcomes and suggesting ways of avoiding damage or limiting their scale this book will be of much interest to students of security governance risk management international security and IR Christopher Daase is Professor at the Goethe University Frankfurt and head of the research department International Organizations and International Law at the Peace Research Institute Frankfurt PRIF HSFK Cornelius Friesendorf is lecturer at the Goethe University Frankfurt and research fellow at the Peace Research Institute Frankfurt PRIF HSFK The Handbook on the Political Economy of War Christopher J. Coyne,Rachel L. Mathers,2011-01-01 The Handbook on the Political Economy of War highlights and explores important research questions and discusses the core elements of the political economy of war *Complete International Law* Ademola Abass,2014 Complete International Law is the only text cases and materials book on international law It is an introductory text which covers a wide range of extracts from primary and secondary materials which are combined with

incisive author commentary **Revisiting Proportionality in International and European Law** Ulf Linderfalk, Eduardo Gill-Pedro, 2021-05-12 This book casts new light on the application of the principle of proportionality in international law. Proportionality is claimed to play a central role in governing the exercise of public power in international law and has been presented as the ultimate rule of law. It has also been the subject of fierce criticism; it is argued that it leads to unreflexive and arbitrary application of the law and deprives rights of their role as a firewall protecting individuals. But the debate on proportionality has tended to focus on the question of how proportionality should be carried out. Much less attention has been devoted to the question of who. This edited volume brings together scholars from a wide range of areas of international law to consider that question: whose interests are at stake when courts and other legal authorities apply the principle of proportionality. In so doing, this volume casts new light on the role which proportionality can play in international law in shaping and modulating the power relations between the different entities governed by it.

Internal Conflict and the International Community Roderic Alley, 2017-07-05 In this insightful book Roderic Alley debates whether conflict within states has emerged as the Achilles Heel of the international community. Utilizing a variety of case materials, the book finds internal conflict posing serious, potentially debilitating challenges to existing institutional policy and analytical practices in international relations. It will greatly interest senior undergraduates, post graduates and scholars of international relations, comparative politics, development studies, international law and security and defence studies.

The Prevention and Intervention of Genocide Samuel Totten, 2017-09-08 Over the last twenty years the world has witnessed four major genocides. There was the genocide in Iraq 1988, in Rwanda 1994, in Srebrenica 1995 and in Darfur 2003 and continuing. Most observers agree there is an urgent need to assess the international community's efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner. This volume, the latest in a widely respected series on the subject of genocide, provides an overview of a host of issues germane to this task. The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years. The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s. Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention. The pros and cons of sanctions and the problems of enforcement and evaluation, their effectiveness, are then discussed. Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking. Later chapters treat the issue of intervention: why and how it has met with only limited success. Concentrating on Rwanda and Srebrenica, chapter 8 discusses various peace operations that were abject failures and those that were moderately successful. The concept of an anti-genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it. Chapters discuss key issues related to post-genocidal periods: those that need to be addressed in order to

establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions
