INSTALLATION AND OPERATION INSTRUCTIONS

IF YOU CANNOT READ OR UNDERSTAND THESE INSTALLATION INSTRUCTIONS DO NOT ATTEMPT TO INSTALL OR OPERATE.

INTRODUCTION

This remote control system was developed to provide safe, reliable, user-friendly remote-control systems for gas heating appliances. The system can be operated manually from the transmitter.

TRANSMITTER

The transmitter operates on a 12V (423) battery that is included. Install the 12V battery supplied with the unit into the battery compartment. It is recommended that ALKALINE batteries always be used for this product. Be sure the batteries are installed with the (+) and (-) ends facing the correct direction.

The LED signal light should illuminate when either the ON or OFF button is pressed. If the signal light does not illuminate, check the position of the transmitter's battery, and if the battery is fully charged.

RECEIVER

When plugged into a standard 115-120 VAC receptacle, the remote receiver operates on commands from the transmitter or from the slide switch on the face of the receiver. (This switch is to be used during a power outage to operate the appliance manually).

- **ON:** will manually turn on the appliance.
- **REMOTE:** will allow use of handheld transmitter. If the system does not respond to the transmitter on initial use, check the battery positions in the remote. If that does not work, see the **LEARNED TRANSMITTER TO RECEIVER** section.
- **OFF:** will disable the remote receiver.
- It is suggested that the slide switch be placed in the OFF position if you will be away from your home for an extended period of time.

The remote receiver is manufactured with a "dry contact" relay in its circuitry that operates like an on/off switch. However, no power or current passes from the 115-120VAC input side to the wires leading from the output side of the remote receiver.

NOTE: This product is designed for use with an attended heating appliance or fire feature. Adults must be present when the Control System is operating. DO NOT program or thermostat directly set this Control to operate a heating appliance or fire feature when Adults are not physically present. Furthermore, DO NOT leave the heating appliance or fire feature burning unattended; it may cause damage or serious injury. If an Adult is going to be away from the heating appliance or fire feature for any length of time, then the thermostat must, manufacturer's manual and application, should be in the "OFF" position.
