Marine Environmental Biology and Conservation Daniel W. Beckman,2013 Marine Environmental Biology and Conservation provides an introduction to the environmental and anthropogenic threats facing the world s oceans and outlines the steps that can and should be taken to protect these vital habitats It begins with a brief overview of the essentials of marine biology and oceanography necessary to understand the conservation material The book then moves through the different habitats in the marine environment such as coastal ecosystems the open ocean and the deep sea exploring the organisms that live there and what conservation dangers and solutions affect these areas

Soil Change Guide: Procedures for Soil Survey and Resource Inventory U.S. Department of Agriculture,2019-04-06 Many soil properties have changed and can change as a result of management historical land use or even natural factors such as drought interacting with land use National soil survey databases currently include soil property information for the relatively static soil properties such as texture and also for properties affected by management such as soil organic matter The databases do not however distinguish the values of dynamic soil properties e g organic matter bulk density infiltration rate

according to their land use management system ecological state or plant community Dynamic soil properties as defined in this Guide are soil properties that change within the human time scale Differences that may exist in these properties can affect the performance of the soil Furthermore some dynamic soil properties change very little in response to management and disturbances

Ecological Characterization of the Central and Northern California Coastal Region: pt.1. Regional characterization. pt.2. Species, 1981 Places of Nature in Ecologies of Urbanism Anne Rademacher, K. Sivaramakrishnan, 2017-03-01 If twenty first century urbanization is understood as a problem its regional epicenter is the cities in Asia Facing unprecedented diversity in scale scope and environmental dynamics in the Asian urban experience scholars will need an approach that can truly capture the significance of place and context The challenge as this volume illustrates can be met by the analytic of ecologies of urbanism Eschewing a rigid single ecology the contributors identify multiple forms of nature in biophysical cultural and political terms that have discernable impact on power relations and human social action The case studies in this book including leopards in Mumbai a network of tubewells in northern India an island that grows through reclamation in Hong Kong and a railway continuum linking Khon Kaen and Bangkok all attest to the versatility of ecologies of urbanism Guided by urban processes rather than geopolitical boundaries Places of Nature in Ecologies of Urbanism offers a picture of urban Asia that is composed of varied ecologies of urbanism This intellectually adventurous work displays a deep cultural ethical sensibility in its close attention to geographically variegated forms of place making A first rate contribution to urban scholarship on Asia and beyond Vinay K Gidwani Department of Geography Environment and Society and Institute for Global Studies University of Minnesota This volume derives from a several year collaborative effort to bring scholars from different disciplines together to reflect on the constructed shifting and contested meanings of the forward slash separating Urban Natures The essays in this volume are bold rigorous original and sometimes even witty Without losing track of the intellectual genealogies that enable their collective effort the authors in Places of Nature in Ecologies of Urbanism give us new tools for imagining urban Asia s possible futures William Glover Department of History University of Michigan
