

Test Better, Teach Better

The Instructional Role of Assessment

The right kinds of tests, correctly applied, can help every teacher become a better teacher. But unless you know the nuts and bolts of effective test design and application, you may find yourself collecting the wrong data, misinterpreting data, and drawing off-base conclusions about what students know and can do, what to teach next, and how effective your instruction has been.

In *Test Better, Teach Better*, assessment expert W. James Popham explores the links between assessment and instruction and provides a jargon-free look at classroom and large-scale test construction, interpretation, and application. Featuring sample items, testing tips, and recommended resources, this "crash course" in instructionally focused assessment includes:

- The four types of instructional decisions that testing will illuminate.
- What you really need to know about measurement concepts like validity, reliability, and bias.
- The advantages and disadvantages of various test formats and experience-based rules for creating great items in each.
- The benefits of assessing student affect and guidelines for doing it in your classroom.

In addition, Popham offers practical advice for dealing with today's myriad testing targets and explains how standards-based achievement tests currently don't (but could) provide both accountability evidence and useful instructional information.

Instruction That Measures Up W. James Popham, 2009-05-26 High stakes testing Mandated content standards and benchmarks Public scrutiny of student and school performance Accountability Teachers today are challenged to provide instruction that will measure up to the expectations of administrators parents and taxpayers to their own professional standards and most essentially to the needs of students Policy debates rage in the press and pedagogical pundits always have a new and better solution to offer but inside the walls of the classroom instruction boils down to teachers deciding what they want their students to learn planning how to promote that learning implementing those plans and then determining if the plans worked And the best instructional decisions are informed by empirical research assessment evidence and the sound judgment of the professional educator In this book W James Popham calls on his half century in the classroom to provide a practical four stage framework for guiding teachers

Rethinking Grading Cathy Vatterott, 2015-07-13 Grading systems often reward on time task completion and penalize disorganization and bad behavior Despite our best intentions grades seem to reflect student compliance more than student learning and engagement In the process we inadvertently subvert the learning process After careful research and years of experiences with grading as a teacher and a parent Cathy Vatterott examines and debunks traditional practices and policies of grading in K 12 schools She offers a new paradigm for standards based grading that focuses on student mastery of content and gives concrete examples from elementary middle and high schools Rethinking Grading will show all educators how standards based grading can authentically reflect student progress and learning and significantly improve both teaching and learning Cathy Vatterott is an education professor and researcher at the University of Missouri St Louis a former middle school teacher and principal and a parent of a college graduate She has learned from her workshops that grading continues to be the most contentious part conjuring up the most intense emotions and heated disagreements Vatterott is also the author of the book Rethinking Homework Best Practices That Support Diverse Needs
