

Geology

Terms to Know

- **Weathering:** The breaking down and changing of rocks and minerals due to natural processes.
- **Erosion:** The process of soil, rocks, and other sediments being carried away or moved by natural forces such as wind, water, and ice.
- **Deposition:** When bits of soil, rocks, and other sediments settle in a new place.

Layers of the Earth

The Earth has layers. Pressure increase the deeper you go below the surface.

- **Crust:** The thin, outermost layer composed of solid rock.
- **Mantle:** The largest layer is below the crust. It is made of molten rock.
- **Outer Core:** The liquid layer below the mantle.
- **Inner Core:** A solid sphere at the center of Earth. It is made of material called nickel.

Earth's Movements

Divergent Boundaries

- Plates move apart from each other.
- Results in volcanoes and mountain formation.

Convergent Boundaries

- Plates move toward each other.
- Results in earthquakes and mountain formation.

Thermal Energy

Earth's thermal energy causes movement within it. It creates currents in the mantle that move the Earth's tectonic plates. This movement can result in earthquakes, volcanoes, and mountains.

Rock Types

Igneous Rocks

Rocks formed when lava or magma cools and hardens.

pumice

Sedimentary Rocks

Rocks formed when sediments are cemented together.

conglomerate

Metamorphic Rocks

Rocks formed by heat and pressure.

gneiss

The Rock Cycle

The rock cycle is a process that shows how rocks can change over time. It starts with rocks breaking down into smaller pieces through weathering and being carried away by erosion. These small pieces compact into sedimentary rocks. With heat and pressure, these sedimentary rocks can transform into metamorphic rocks. If the rocks melt and cool down, they can become igneous rocks. This cycle keeps repeating over millions of years.

Fossils

Fossils are the remains or traces of plants and animals that lived long ago. By studying fossils found in different rock layers, scientists can make inferences about what the Earth was like a long time ago.

Learning Handbook offers teachers and principals an innovative program for customizing schooling to the learning needs of individual students and for motivating them to take increasing responsibility for deciding what and how they should learn. Whether the students are struggling or proficient the program is designed to nurture their natural passion for learning and mastery, challenging them to go beyond the easy and familiar so they can truly excel. The program can be introduced in stages in any middle or high school classroom and enables students of diverse abilities to design and pursue independent course work, special projects or even artistic presentations, community field work or apprenticeships. Using this approach the students take on an increasingly autonomous self directed role as they progress. The heart of the program is the action contract or learning agreement whereby the student sets challenging yet attainable goals, commits to a path for achieving them and evaluates the results. Special emphasis is placed on developing skills and competencies that can serve the student well in his or her academic and career endeavors. **Resources in Education** ,1999
