Financial Determinants of SME Activity in Developing Countries Piotr Łasak, 2022-01-01 **PURPOSE** The traditional sources of financing bank loans cannot be treated as an essential source of financing for SMEs in developing countries. For this reason, this group of entities uses many alternative sources from bootstrapping to microfinance and crowdfunding. During the last decade, a significant contribution in this area has been done by financial technology. The purpose of this study is threefold: 1 to present the role of financial technologies in financing SMEs; 2 to examine the role of entities based on financial technology in financing SMEs in developing countries; and 3 to consider other non-bank aspects of financing SMEs leading to the improvement of the financial situation of these entities. The in-depth analysis of these entrepreneurial finance practices will be developed in the following papers presented in this Issue. **METHODOLOGY** This study employs a theoretical approach based on a narrative literature review. The primary attention is focused on applying financial technology as a stimulant for the finance of SMEs in developing countries. **FINDINGS** As a consequence of the financing gap for SMEs within the traditional financial system, these entities use non-bank financing based on financial technology. The research confirms that financial technology plays a crucial role in fostering the financial situation of SMEs in developing countries and providing greater financial inclusion for these entities. Both financial technology and enterprises based on this technology contribute significantly to the improvement of efficiency of financing SMEs in emerging markets. They also provide a broader range of services than were offered by the traditional financial sector. Regarding the other aspects of SME finance, it is essential to implement such ways of financing like microfinance services and crowdfunding. Such funding mechanisms together with the budget process and the compliance under the conditions of e-tax systems are important determinants of current entrepreneurial finance. **IMPLICATIONS** The paper describes the financing of SMEs in developing countries. The in-depth picture of the SME's financial situation focusing on the technological development in this area provides essential insight into this still poorly explored area. It also offers important premises for shaping the post-pandemic policy to support their further growth. **ORIGINALITY VALUE** Despite growing theoretical and empirical literature about entrepreneurial finance, this study aims to contribute to the role of financial technology in this area. The impact of financial technologies and the role of fintech-based entities on SME activity in developing countries are still poorly researched. Moreover, the research provides a brief overview of other SME funding sources and their determinants in this group of countries. *Living Forever* Jan Fawcett, 2013-05-20 So easily could one imagine this story infused with the rich detail of character setting and motivation that would transform it into a memorable work of brilliant insight. *Clarion Review* Throughout this compelling story, Fawcett makes fascinating inquiries about life, evolution, and the true nature of man, proving that with all of our technology, the human mind still remains the most powerful and mysterious tool. *Kirkus Review* Faced with imminent death after a grim cancer diagnosis, sixty-eight-year-old Dr. Ian Farrell decides that he and his wife Caitlin should live life fully and appreciate every

moment he has left together After Ian and Caitlin return to Chicago from a spontaneous trip to Santa Fe Ian has no idea that he will soon have a tempting carrot dangled in front of his nose the chance to live forever When Ian lands back in the hospital for more tests two agents from a governmental research agency ask him to submit to an attempted transfer of his mind to an electronic chip With very little time left to live Ian accepts He flies to Project Phoenix the next day with Caitlin and Colonel Wild Bill Clausen the head of Project Phoenix After he bids his wife good bye Ian swears his allegiance to the United States lies on a table and heads into the bowels of a machine that will change his destiny forever In this intriguing novel a dying man now left with nothing but his consciousness must create a new identity and partner with a brilliant neurophysicist in order to save humankind from a destructive technology

Winning with Trust in Business Bell, Arthur H., Although deception has become commonplace in the corporate world its consequences can have crippling effects Bell and Cohn address how employees are pressured to conceal criticisms and deny mistakes They follow the effects of false excuses from the ground up revealing how these lies can infect management systems at the highest levels An open work environment on the other hand is able to identify problems and address them as needed As a result companies are able to remain competitive and are better equipped to navigate economic cycles and business downturns The authors use interviews and corporation profiles to demonstrate strategies for promoting truthfulness in employees

On Values in Finance and Ethics Henry Schäfer, 2019-01-04 This book uses the building blocks of modern capital market theory including behavioural finance as the point of departure for an analysis of hidden ethical content in the contemporary research into capital markets It illustrates the significant degree of alienation between the financial and the real side of economies stemming from the long standing struggle between ethics and economics Furthermore it provides a roadmap of modern value thinking highlighting the crucial role of stakeholders and non governmental organizations

The Materiality of Narrative Dynamics Stefan Iversen, Evan Van Tassell, 2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research but relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material forms of cultural texts This volume seeks to remedy this by asking questions such as How might the affordances of new media guide audience reception in subtle ways How might the dynamism of legacy media be better recognized when examined through a multimedial lens How do the physical processes of production define the horizons of both authorial activity and audience response The insight that drives these investigations is two fold first that functions and effects of narratives are deeply intertwined with material forces of production distribution and reception and second that an analysis of any specific narrative must include attention to these material matters and how they affect the unfolding of stories over time The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas In doing so they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled

DIGITAL ENTREPRENEURSHIP Dr. Suvarna S, Mr. Suresh Chalavadi & Mrs. Lavanya N Gowda, 2025-08-16

Digital entrepreneurship is a modern approach to business that harnesses the power of digital technologies to create, promote and manage ventures. Unlike traditional entrepreneurship which often requires physical infrastructure and high startup capital, digital entrepreneurship offers a more accessible, flexible and scalable model. Entrepreneurs can now launch online stores, mobile apps, content platforms or service-based businesses with minimal investment thanks to tools like cloud computing, social media, digital payment systems and data analytics. Digital entrepreneurship involves the identification and exploitation of digital opportunities to deliver innovative products, services or business models primarily through digital platforms such as websites, mobile applications, social media and e-commerce portals. Unlike traditional entrepreneurship, digital entrepreneurship leverages the internet, cloud computing, big data, artificial intelligence and other emerging technologies to create scalable and flexible businesses. Digital entrepreneurship is driven by the rapid evolution of information and communication technologies (ICTs) which have redefined how businesses operate, interact with customers and compete in the global marketplace. The digital environment offers lower entry barriers, reduced operational costs, global market access and real-time customer engagement, making it a fertile ground for start-ups and innovators. Entrepreneurs can now test ideas quickly, adapt to market feedback in real-time and reach a wide audience with minimal physical infrastructure.

She Leads by Amelia Green, AI, 2025-03-04. She Leads empowers women to excel in leadership by addressing critical areas such as leadership skills, strategic business acumen and decision-making. It examines the historical underrepresentation of women and the evolution of gender dynamics, providing context for the challenges women face. The book argues that by cultivating specific skills and tailored approaches, women can overcome barriers and redefine leadership. Did you know women hold only about 28% of CEO positions? This book aims to change this by providing practical tools to navigate bias, negotiate effectively and build strong networks. The book starts by establishing core leadership concepts and progresses into specific challenges women face, like overcoming bias and building networks. Later chapters explore strategic thinking, financial literacy and emotional intelligence. Case studies of successful women leaders provide actionable strategies. The book's unique value lies in its practical strategies tailored to women's challenges, moving beyond theory with concrete tools for real-world application.
