Dechant,2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching *Commonsense Methods for Children with*

The Nature of Technology Michael P. Clough, Joanne K. Olson, Dale S. Niederhauser, 2013-09-03 How does technology alter thinking and action without our awareness How can instantaneous information access impede understanding and wisdom How does technology alter conceptions of education schooling teaching and what learning entails What are the implications of these and other technology issues for society Meaningful technology education is far more than learning how to use technology It entails an understanding of the nature of technology what technology is how and why technology is developed how individuals and society directly react to and are sometimes unwittingly changed by technology

This book places these and other issues regarding the nature of technology in the context of learning teaching and schooling. The nature of technology and its impact on education must become a significant object of inquiry among educators. Students must come to understand the nature of technology so that they can make informed decisions regarding how technology may influence thinking values and action and when and how technology should be used in their personal lives and in society. Prudent choices regarding technology cannot be made without understanding the issues that this book raises. This book is intended to raise such issues and stimulate thinking and action among teachers teacher educators and education researchers. The contributions to this book raise historical and philosophical issues regarding the nature of technology and their implications for education challenge teacher educators and teachers to promote understanding of the nature of technology and provide practical considerations for teaching the nature of technology.

Literacy Education and Indigenous Australians Jennifer Rennie, Helen Harper, 2019-10-21 This edited volume brings together diverse perspectives on Australian literacy education for Indigenous peoples highlighting numerous educational approaches ideologies and aspirations. The Australian Indigenous context presents unique challenges for educators working across the continent in settings ranging from urban to remote and with various social and language groups. Accordingly one of the book's main goals is to foster dialogue between researchers and practitioners working in these contexts and who have vastly different theoretical and ideological perspectives. It offers a valuable resource for academics and teachers of Indigenous students who are interested in literacy focused research and complements scholarship on literacy education in comparable Indigenous settings internationally.

Foundations of Reading Acquisition and Dyslexia Benita A. Blachman, 2013-03-07 The chapters in this volume are based on presentations made at a recent conference on cognitive and linguistic foundations of reading acquisition. The researchers who participated have all made contributions to the theoretical and empirical understanding of how children learn to read. They were asked to address not only what they have learned from their research but also to discuss unsolved problems. This dialogue prompted numerous questions of both a theoretical and applied nature generated heated debate and fueled optimism about the important gains that have been made in the scientific understanding of the reading process especially of the critical role played by phonological abilities.
