Syllabus Civic Problems Classic Reprint:

A Syllabus of Civic Problems (Classic Reprint), 2018-02-12 Excerpt from A Syllabus of Civic Problems This syllabus is intended as an aid to student teachers and pupils It suggests a few of the many civic problems awaiting investigation and solution While it may be used in the order of arrangement the plan of the author is to study such subjects as are uppermost in the public mind thus bringing the pupil in touch with community thought This gives a chance to coordinate the work of the schoolroom with the needs of the public and affords opportunity for both to work together for the common good About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Teaching Civic Literacy Projects Shira Eve Epstein, 2014-09-01 This practical resource shows teachers how to enact robust forms of civic education in today's schools Both instructive and thought provoking it will inspire teachers to craft curricula addressing a wide range of genuine civic problems such as those related to racial discrimination environmental damage and community health Dividing civic literacy projects into three key phases problem identification problem exploration and action the author provides concrete examples from upper elementary middle and high school classrooms to illustrate and analyze how each phase can unfold The projects ultimately provide opportunities for youth to participate in civic life while they develop essential literacy skills associated with reading writing and speaking The final chapter outlines a curriculum design process that will result in coherent and meaningful civic literacy projects driven by clear goals It includes practical tools such as a sample unit timeline an assessment chart and student worksheets that can be modified for immediate use

Schools, Curriculum and Civic Education for Building Democratic Citizens Murray Print, Dirk Lange, 2013-02-12 How can schools and the school curriculum contribute to building democratic citizens This is a major question posed by governments educational systems schools teachers and researchers around the world One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum Another question must then be posed what competences do young citizens need to be considered as active and engaged in modern democracies In 2011 an invited research symposium of leading civic and political educators and social scientists from across Europe met in Hannover Germany to consider this key concern facing Europe today In examining the above questions the symposium addressed two significant issues 1 Identify key competencies required for active citizenship of young people in Europe of the future 2 Translate those competencies to school based activities in the form of curricular and pedagogical strategies The publication *Civic Education and Competences for Engaging Citizens* in

Democracies addressed the first issue and this volume addresses the second issue Through discussion in the invited symposium previously prepared papers and participation in a modified Delphi Technique the participants have prepared chapters for this book The chapters of this book represent the contribution of the participants before during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum Murray Print and Dirk Lange are professors from the University of Sydney and Leibniz University of Hannover respectively and are national leaders in civics and citizenship education in their respective countries They have brought together a group of leading European civic and citizenship educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens Making Civics Count David E. Campbell, Meira Levinson, Frederick M. Hess, 2012-10-01 By nearly every measure Americans are less engaged in their communities and political activity than generations past So write the editors of this volume who survey the current practices and history of citizenship education in the United States They argue that the current period of creative destruction when schools are closing and opening in response to reform mandates is an ideal time to take an in depth look at how successful strategies and programs promote civic education and good citizenship Making Civics Count offers research based insights into what diverse students and teachers know and do as civic actors and proposes a blueprint for civic education for a new generation that is both practical and visionary *Teachers' Schools and the Making of the Modern Chinese Nation-State, 1897-1937* Xiaoping Cong, 2011-01-01 During the educational and social transformations in politically tumultuous early twentieth century China Chinese teacher s schools played a critical role They were a force in the changes that swept Chinese society bridging Chinese and Western ideals empowering women and contributing to rural modernization This innovative account examines the social and political aspects and impacts of these schools their role in a society in transition and their production of grassroots forces that lead to the Communist Revolution **Defining the Humanities** Robert E. Proctor, 1998-12-22 Think of this as The Thinking Man s Bloom or The Thinking Woman s Closing of the American Mind It takes up debates about education and reasons about them where Bloom often only blasted away This is one of the more helpful recent statements of the case for the classics accompanied by rather venturesome curricular suggestions Christian Century His exciting readable book calls for a return to a study of the classics and of the Renaissance poets and scholars like Petrarch who rediscovered the classics Michael Dirda Washington Post Book World a splendid statement bringing together in a careful and coherent way the prospects for a solid humanities curriculum Ernest L Boyer Ten years ago when this book was first published it was called Education s Great Amnesia Reconsidering the Humanities from Petrarch to Freud It is being reissued now in a second edition with a different title for a new generation of readers who cannot have forgotten what they never knew What are the humanities Can we agree on a core curriculum of humanistic studies Robert Proctor answers these questions in a provocative readable book Resources in Education , 1999-10 Learning and

Teaching in the Chinese Classroom Shane N. Phillipson, Bick-har Lam, 2011-10-01 A major concern of all education authorities around the world is the challenge that schools face in catering for learner diversity That this concern is shared by authorities in East Asia including the Education Bureau EDB of Hong Kong is surprising given the high academic achievement of students from this part of the world This book helps to meet this challenge for teachers in East Asia by focusing on specific research that helps explain the basis for diversity in the Chinese learner Although there are many textbooks that cover the basic principles of educational psychology few do not focus on the Chinese learner This book makes the link between the broad field of educational psychology and how these theories contribute to our understanding of the Chinese learner This book is unique in that it draws on recent research to illustrate the application of these theories thereby helping teachers and students in teacher education programmes understand the variability in student achievement Our book is based on the idea that the Chinese context is in many ways different to other cultural contexts and that teachers can make a difference to the outcomes of student learning We also draw on our many years of experience in educating future teachers where our students want us to focus on the Chinese classroom Our student teachers also want to be educated by professors who are themselves researchers In drawing on research about the Chinese learner we also bring to our student teachers the richness and value of educational research We also encourage our student teachers to think of themselves as professional researchers in terms of developing an understanding of the research literature and in finding solutions to their classroom problems
