Ardekani, Arda Kiani, Seyed Alireza Nadji, Ali Yousefi, 2023-02-09 *The Hexagon Story* Frederic C. E. Oder, 2012 The United States developed the Gambit and Hexagon programs to improve the nation's means for peering over the iron curtain that separated western democracies from east European and Asian communist countries The inability to gain insight into vast denied areas required exceptional systems to understand threats posed by US adversaries Corona was the first imagery satellite system to help see into those areas Hexagon began as a Central Intelligence Agency CIA program with the first concepts proposed in 1964 The CIA's primary goal was to develop an imagery system with Corona like ability to image wide swaths of the earth but with resolution equivalent to Gambit Such a system would afford the United States even greater advantages monitoring the arms race that had developed with the nation's adversaries The system that became Hexagon faced three major challenges The first was development of the technology which was eventually overcome by the Itek and Perkin Elmer Corporations The second was bureaucratic deciding how the CIA and Air Force would cooperate in building such a system because they each had strengths

Health Systems Recovery in the Context of COVID-19 and Protracted Conflict Zsuzsanna Jakab, Sohel Saikat, Duncan Selbie, Saqif Mustafa, Yu Zhang, Geraldine McDarby, Mila Petrova, Redda Seifeldin, 2023-07-10

The COVID 19 pandemic has caused unprecedented disruption worldwide highlighting once again the interdependency of health and socioeconomic development and the global lack of health systems resilience Two years into the pandemic most countries report sustained disruptions across service delivery platforms and health areas with a profound impact on health outcomes The impact of these disruptions is magnified within marginalized communities and in countries experiencing protracted conflict There is an urgent need to focus on recovery through investment in the essential public health functions EPHFs and the foundations of health systems with a focus on primary health care and whole of government and society engagement The aim of this Research Topic is to gather transfer and promote operationalization of key experiences from COVID 19 to inform global and country level recovery that better promote health guide policy direction towards building health systems resilience and thereby ensure economic and social prosperity Experience with COVID 19 has demonstrated that traditional approaches to health system strengthening have failed to achieve the complementary goals of Universal Health Coverage UHC and health security with the divide between the most vulnerable and well off only widening Much of what had been learned from previous experiences such as Ebola in West Africa has not been widely applied This has left health and economic systems vulnerable to 21 st century public health challenges ranging from conflict and natural disasters to aging demographics and rising rates of non communicable and communicable diseases and antimicrobial resistance These challenges require intentional focus and investment as well as whole of government and society engagement with health to build health system

resilience Greater action is needed to prevent the devastating effects of war and conflict on the health of the most vulnerable This Research Topic will convene the knowledge and practices of leaders in public health health systems and humanitarian and development sectors This is to ensure lessons from COVID 19 inform the recovery agenda and promote sustainable health and socioeconomic recovery for all Lest we forget and find ourselves again unprepared and vulnerable in the face of an even greater threat
