Soft Computing Techniques In Vision Science Studies In Computational Intelligence:

Soft Computing Techniques in Vision Science Srikanta Patnaik, Yeon-Mo Yang, 2012-02-15 This Special Edited Volume is a unique approach towards Computational solution for the upcoming field of study called Vision Science From a scientific firmament Optics Ophthalmology and Optical Science has surpassed an Odyssey of optimizing configurations of Optical systems Surveillance Cameras and other Nano optical devices with the metaphor of Nano Science and Technology Still these systems are falling short of its computational aspect to achieve the pinnacle of human vision system In this edited volume much attention has been given to address the coupling issues Computational Science and Vision Studies It is a comprehensive collection of research works addressing various related areas of Vision Science like Visual Perception and Visual system Cognitive Psychology Neuroscience Psychophysics and Ophthalmology linguistic relativity color vision etc This issue carries some latest developments in the form of research articles and presentations The volume is rich of contents with technical tools for convenient experimentation in Vision Science There are 18 research papers having significance in an array of application areas The volume claims to be an effective compendium of computing developments like Frequent Pattern Mining Genetic Algorithm Gabor Filter Support Vector Machine Region Based Mask Filter 4D stereo camera systems Principal Component Analysis etc The detailed analysis of the papers can immensely benefit to the researchers of this domain It can be an Endeavour in the pursuit of adding value in the existing stock of knowledge in Vision Science *Proceedings of Ninth International Congress on Information and Communication Technology* Xin-She Yang, Simon Sherratt, Nilanjan Dey, Amit Joshi, 2024-08-01 This book gathers selected high quality research papers presented at the Ninth International Congress on Information and Communication Technology held in London on February 19 22 2024 It discusses emerging topics pertaining to information and communication technology ICT for managerial applications e governance e agriculture e education and computing technologies the Internet of Things IoT and e mining Written by respected experts and researchers working on ICT the book offers an asset for young researchers involved in advanced studies The work is presented in ten volumes *Handbook of Research on Emerging Perspectives in Intelligent Pattern Recognition, Analysis, and Image Processing* Kamila, Narendra Kumar, 2015-11-30 **International Conference on Emerging Trends in Electrical, Communication and Information Technologies, Vol 1 , Computational Intelligence** Kurosh Madani, Antonio Dourado Correia, Agostinho Rosa, Joaquim Filipe, 2012-02-18 The present book includes a set of selected extended papers from the second International Joint Conference on Computational Intelligence IJCCI 2010 held in Valencia Spain from 24 to 26 October 2010 The conference was composed by three co located conferences The International Conference on Fuzzy Computation ICFC the International Conference on Evolutionary Computation ICEC and the International Conference on Neural Computation ICNC Recent progresses in scientific developments and applications in these three areas are reported in this book IJCCI received 236 submissions from 49 countries in all continents After a double blind paper review performed by

the Program Committee only 30 submissions were accepted as full papers and thus selected for oral presentation leading to a full paper acceptance ratio of 13% Additional papers were accepted as short papers and posters A further selection was made after the Conference based also on the assessment of presentation quality and audience interest so that this book includes the extended and revised versions of the very best papers of IJCCI 2010 Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next editions considering not only the stringent paper acceptance ratios but also the quality of the program committee keynote lectures participation level and logistics

Handbook of Research on Computational Intelligence for Engineering, Science, and Business Bhattacharyya, Siddhartha, Dutta, Paramartha, 2012-11-30

Using the same strategy for the needs of image processing and pattern recognition scientists and researchers have turned to computational intelligence for better research throughputs and end results applied towards engineering science business and financial applications *Handbook of Research on Computational Intelligence for Engineering Science and Business* discusses the computation intelligence approaches initiatives and applications in the engineering science and business fields This reference aims to highlight computational intelligence as no longer limited to computing related disciplines and can be applied to any effort which handles complex and meaningful information

Service Orientation in Holonic and Multi-Agent Manufacturing Control Theodor Borangiu, André Thomas, Damien Trentesaux, 2012-03-26

Service orientation is emerging nowadays at multiple organizational levels in enterprise business and it leverages technology in response to the growing need for greater business integration flexibility and agility of manufacturing enterprises The Service Oriented Architecture SOA analysed throughout the book represents a technical architecture a business modelling concept a type of infrastructure an integration source and a new way of viewing units of automation within the enterprise The primary goal of SOA is to align the business world with the world of information technology in a way that makes both more effective The service value creation model at enterprise level consists of using a Service Component Architecture for business process applications based on entities which handle services In this view a service is a piece of software encapsulating the business control logic or resource functionality of an enterprise entity that exhibits an individual competence and responds to a specific request to fulfil a local operation or global objective batch production The value creation model is based on a 2 stage approach Agentification complex manufacturing processes are split in services provided by informational agents which are discovered accessed and executed This leads to a modular reusable agile and easy integrate integration Holonification holons link the material flow and physical entities of the manufacturing processes with the informational part IT services realized by distributed intelligence facilitating thus traceability the developing of flexible control systems This book gathers contributions from scientists researchers and industrialists on concepts methods frameworks and implementing issues addressing trends in the service orientation of control technology and management applied to manufacturing enterprise This book gathers contributions from scientists researchers and industrialists on concepts methods frameworks and implementing

issues addressing trends in the service orientation of control technology and management applied to manufacturing enterprise

Artificial Intelligence and Soft Computing Leszek Rutkowski, Rafał Scherer, Marcin Korytkowski, Witold Pedrycz, Ryszard Tadeusiewicz, Jacek M. Zurada, 2025-10-31 This volume constitutes the proceedings of 24th International Conference on Artificial Intelligence and Soft Computing ICAISC 2025 Zakopane Poland during June 22-26 2025 The 83 full papers included in this book were carefully reviewed and selected from 163 submissions They are organized in topical sections as follows Part I Neural Networks and Their Applications Fuzzy Systems and Their Applications Evolutionary Algorithms and Their Applications Part II Computer Vision Image and Speech Analysis Data Mining Pattern Classification and Artificial Intelligence in Modeling and Simulation Part III Various Problems of Artificial Intelligence Agent Systems Robotics and Control Bioinformatics Biometrics and Medical Applications and Concurrent Parallel Processing

Computational Intelligence Techniques for New Product Design Kit Yan Chan, C.K. Kwong, Tharam S. Dillon, 2012-02-15 Applying computational intelligence for product design is a fast growing and promising research area in computer sciences and industrial engineering However there is currently a lack of books which discuss this research area This book discusses a wide range of computational intelligence techniques for implementation on product design It covers common issues on product design from identification of customer requirements in product design determination of importance of customer requirements determination of optimal design attributes relating design attributes and customer satisfaction integration of marketing aspects into product design affective product design to quality control of new products Approaches for refinement of computational intelligence are discussed in order to address different issues on product design Cases studies of product design in terms of development of real world new products are included in order to illustrate the design procedures as well as the effectiveness of the computational intelligence based approaches to product design This book covers the state of art of computational intelligence methods for product design which provides a clear picture to post graduate students in industrial engineering and computer science It is particularly suitable for researchers and professionals working on computational intelligence for product design It provides concepts techniques and methodologies for product designers in applying computational intelligence to deal with product design

Advances in Soft Computing and Machine Learning in Image Processing Aboul Ella Hassanien, Diego Alberto Oliva, 2017-10-13 This book is a collection of the latest applications of methods from soft computing and machine learning in image processing It explores different areas ranging from image segmentation to the object recognition using complex approaches and includes the theory of the methodologies used to provide an overview of the application of these tools in image processing The material has been compiled from a scientific perspective and the book is primarily intended for undergraduate and postgraduate science engineering and computational mathematics students It can also be used for courses on artificial intelligence advanced image processing and computational intelligence and is a valuable resource for researchers in the evolutionary computation artificial intelligence and image
