change is also a great philosophical puzzle. Indeed its existential and practical relevance can be thought to largely derive from the philosophical complications it engenders. Climate change is applied philosophy par excellence. Preventing dangerous anthropogenic climate change needs very good philosophy applied to concrete and specific practical issues. Climate change is an area where scholars from very different provenances should cooperate on equal terms, having in view a common and really important purpose: contribute to preventing great burdens and even the extinction of humankind and the destruction of hospitable and valuable non-human nature.
