

A movie poster for 'Alien Invasion'. The top half features a large, dark, metallic alien head with a ribbed texture, its mouth open as if screaming or roaring. Below it, a man with long brown hair is shown from the chest up, his face contorted in a scream with his eyes closed and hands clutching his head. The background is a misty, forested landscape. The text 'WE DO NOT COME IN PEACE' is in the top right, and 'ALIEN INVASION' is in large green letters at the bottom.

Alien-Invasion Films Mark E. Wildermuth, 2022-11-16 This book studies American science fiction films depicting invasions of the USA and Earth by extra terrestrials within the context of imperialism from 1950 2020 It shows how such films imagine America and its allies as objects of colonial control This trope enables filmmakers to explore the ethics of American interventionism abroad either by defending the status quo or by questioning interventionism The study shows how these films comment on American domestic hegemonic practices regarding racial or gender hierarchies as well as hegemonic practices abroad Beginning with the Cold War consensus in the 1950s the study shows how hegemony at home and abroad promotes division in the culture

The Oxford Handbook of Millennialism Catherine Wessinger, 2016-07 Seventh Day Adventists Melanesian cargo cults David Koresh's Branch Davidians and the Raelian UFO religion would seem to have little in common What these groups share however is a millennial orientation the audacious human hope for a collective salvation which may be either heavenly or earthly The Oxford Handbook of Millennialism offers readers an in depth look at both the theoretical underpinnings of the study of millennialism and its many manifestations across history and cultures

Global Plant Invasions David R. Clements, Mahesh K. Upadhyaya, Srijana Joshi, Anil Shrestha, 2022-04-18 Invasive species have inspired concern for many reasons including economic and environmental impacts in specific jurisdictions within particular countries However it is apparent that for some invasive plant species political borders offer only weak barriers because these species have succeeded in invading many countries emerging as threats at a global level With this level of threat a number of books on invasive plants and invasive species in general have been published in recent years but none explicitly provides global coverage perhaps because it is only recently that the full geographical economic and environmental implications of widespread spread and adaptive nature of these particular invasive plants have been recognized We plan to make this volume unique by profiling plant invasions in explicitly geographical contexts on the world continents Chapters 5 11 as well as islands Chapter 12 and mountains Chapter 13 This global approach is supported by an overview of invasion biology and

recent advances Chapter 1 and how different communities differ in invasibility Chapter 2 Global factors influencing invasion are introduced in Chapter 3 globalized trade and Chapter 4 climate change Key species are profiled through geographic treatments continent by continent Chapters 5 11 and for islands Chapter 12 and mountains Chapter 13 The impact of invasive plants is highlighted in Chapter 14 both in biotic and economic terms partly to counter the tendency for the young field of invasion biology to rely too much on anecdotal evidence This chapters is also designed to bring home the message that these are serious problems that must be dealt with as covered in the subsequent chapters The book concludes with three chapters casting light on solutions to the many problems described in the rest of the volume Chapter 15 features new innovative technologies that are being developed to monitor and manage invasive plants and Chapter 16 presents comprehensive strategies for public education and implementation of management on local and global scales Chapter 17 describes different future scenarios depending on current trends in plant invasion and its management just as climate change predictions employ various scenarios to project the future The future is very much up to us as humanity grapples with the question of how best to strategically meet the problems of global invasive plant problems that we ourselves have created that is further challenged by a changing climate We are confident that this book will be of interest to invasion biologists resource managers and the legion of others who must deal with these invasive plants across the globe on a daily basis

Novel Ecosystems Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystems services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and

restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today's rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the question of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at www.wiley.com/go/hobbs_ecosystems

Quarterly Review of Military Literature, 1981 *The Liverpool Companion to World Science Fiction Film* Sonja Fritzsche, 2014-06-16 The Liverpool Companion to World Science Fiction Film offers critical insights into SF far beyond the more common Anglo American narratives Contributors take either a national or transnational approach and stretch the geographic and conceptual boundaries of science fiction cinema Recurrent themes include genre discussions engagement with Hollywood and the international subgenre of science fiction parody Chapters contain a variety of perspectives and styles from gender and race studies to the eco critical and the post colonial from the avant garde to socialist realism and the Hammer film Edited by Sonja Fritzsche the collection contains fourteen chapters written by specialists from around the world Film traditions represented include Argentina Australia Brazil Cameroon China the Czech Republic France Germany India Ireland Italy Japan Kenya Poland the United Kingdom and the United States There is also a chapter on digital shorts From the dinosaur myth that became Godzilla to Brazilian science fiction comedy from China's Death Ray to Kenya's Pumzi this book will broaden the horizons of scholars and students of science fiction

International Companion Encyclopedia of Children's Literature Peter Hunt, 2004-08-02 Children's publishing is a huge international industry and there is ever growing interest from researchers and students in the genre as cultural object of study and tool for education and socialization

Challenging Anthropocentrism in Eco-Science Fiction Novels Fatma Gamze Erkan, 2024-01-03 This book explores the relationship between humanity and nature while challenging the notion that anthropocentric behaviour causes the environmental catastrophes depicted in the four selected British eco science fiction novels These novels are John Christopher's *The Death of Grass* 1956 J G Ballard's *The Drought* 1965 Brian Aldiss's *Earthworks* 1965 and John Brunner's *The Sheep Look Up* 1972 all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious This book examines how even the smallest damage caused by human beings to the environment negatively affects them other living beings and the ecosystem they need to live and flourish In conjunction with these the factors and conditions that push characters in the novels to ignore and harm the environment are also scrutinised While

examining how and why the environmental problems in the novels have arisen it is evaluated whether the authors propose solutions to these problems and if so what they are
