Cli Fi Novel Quick Start:

Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth s ecosystems and the socioeconomically disadvantaged Cli Fi and Class focuses on the representation of class dynamics in climate change narratives With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn **Empowering**

relevant to the understanding of the premises and implications of the impacts of climate change on human and nonhuman life on Earth. More specifically, the handbook examines the scientific accounts of climate change as well as its causes. It explores the tools offered by social sciences and humanities to study the societal premises and impacts of climate change as well as delving deeper into the ethical and political issues connected with and resulting from climate change. By doing so, it puts it all in an ecological and historical context. In addition, the book offers solutions to some important philosophical puzzles and problems and indicates paths of interaction between philosophy and other disciplines. The discussion about climate change and the mitigation/adaptation policies spans many areas and levels from abstract science and philosophy to current on-the-ground politics. However, climate change is also a great philosophical puzzle. Indeed, its existential and practical relevance can be thought to largely derive from the philosophical complications it engenders. Climate change is applied philosophy par excellence. Preventing dangerous anthropogenic climate change needs very good philosophy applied to concrete and specific practical issues. Climate change is an area where scholars from very different provenances should cooperate on equal terms, having in view a common and really important purpose: contribute to preventing great burdens and even the extinction of humankind and the destruction of hospitable and valuable non-human nature.

Monstrous Nature Robin L. Murray, Joseph K. Heumann, 2016

Godzilla, a traditional natural monster and representation of cinema's subgenre of natural attack, also provides a cautionary symbol of the dangerous consequences of mistreating the natural world. Monstrous nature on the attack. Horror films such as Godzilla invite an exploration of the complexities of a monstrous nature that humanity both creates and embodies. Robin L. Murray and Joseph K. Heumann demonstrate how the horror film and its offshoots can often be understood in relation to a monstrous nature that has evolved either deliberately or by accident and that generates fear in humanity as both character and audience. This connection between fear and the natural world opens up possibilities for ecocritical readings often missing from research on monstrous nature, the environment, and the horror film. Organized in relation to four recurring environmental themes in films that construct nature as a monster: anthropomorphism, human ecology, evolution, and gendered landscapes, the authors apply ecocritical perspectives to reveal the multiple ways nature is constructed as monstrous or in which the natural world itself constructs monsters. This interdisciplinary approach to film studies fuses cultural, theological, and scientific critiques to explore when and why nature becomes monstrous.

Negotiating Waters: Seas, Oceans, and Passageways in the Colonial and Postcolonial Anglophone World André Dodeman, Nancy Pedri, 2020-01-31

This book examines how seas, oceans, and passageways have shaped and reshaped cultural identities, spurred stories of reunion and separation, and redefined entire nations. It explores how entire communities have crossed seas and oceans voluntarily or not to settle in foreign lands and undergone identity, cultural, and literary transformations. It also explores how these crossings are represented. The book thus contributes to oceanic studies, a field of study that asks how the seas and oceans have and continue to affect political narratives of exploration, cartography,

international maritime law identity insularity and literary issues survival narratives fishing stories Divided into three sections *Negotiating Waters* explores the management the crossings and the re imaginings of the seas and oceans that played such an important role in the configuration of the colonial and postcolonial world and imagination In their careful considerations of how water figures prominently in maps travel journals diaries letters and literary narratives from the 17th century onwards the three thematic sections come together to shed light on how water in all of its shapes and forms has marked lands nations and identities They thus offer readers from different disciplines and with different colonial and postcolonial interests the possibility to investigate and discover new approaches to maritime spaces By advancing views on how seas and oceans exert power through representation *Negotiating Waters* engages in important critical work in an age of rising concern about maritime environments

Understanding Public Debates Jens Martin Gurr,2024-06-20 By historicizing and contextualizing them through readings of carefully selected literary texts literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today whether on different conceptions of liberty identity politics historical commemoration challenges of globalization or responses to climate change *Understanding Public Debates* presents case studies including Milton s *Paradise Lost* P B Shelley s 1820 Reform essay Philip Roth s *The Human Stain* the songwriting of Neil Young and Edward Young s 1720s *Sea Odes* recent climate fiction as well as non literary conflict narratives Rather than mining texts for arguments for or against certain positions this book is interested in how texts stage these debates by means of multiple perspectives narrative situations or ambiguities By suggesting how educators might use literary texts as conversation starters for more rational debates the volume also contributes to Public Literary Studies Three important fields are here brought together 1 the study of societal debates and conflicts and the ways in which they challenge pluralist societies 2 explorations of the societal functions of literature and of non literary narratives and 3 discussions of the role and functions of literary studies The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates
