9 Architectural concepts and styles seem to flourish on a variety of levels from the most local of contexts to the global This book investigates regionalism which is often conceived today as a late nineteenth century phenomenon because of the preservation and restoration movements that arose during that period Derived from the workshop The Sources of Regionalism held by the FWO research group World Views Cultural Identities and Architecture in Western Europe 1815 1940 the essays in this book examine the meaning of regionalism in architecture art and literature its sources and its cultural and historical background The contributors focus on the nineteenth century and the years of the twentieth century before World War I and focus geographically on Western Europe with an emphasis on Belgium France and England Together their essays provide a thorough examination of the complexity and multilayered quality of regionalism Literature of the Low Countries

Reinder Meijer, 2012-12-06 In any definition of terms Dutch literature must be taken to mean all literature written in Dutch thus excluding literature in Frisian even though Friesland is part of the Kingdom of the Netherlands in the same way as literature in Welsh would be excluded from a history of English literature Similarly literature in Afrikaans South African Dutch falls outside the scope of this book as Afrikaans from the moment of its birth out of seventeenth century Dutch grew up independently and must be regarded as a language in its own right Dutch literature then is the literature written in Dutch as spoken in the Kingdom of the Netherlands and the so called Flemish part of the Kingdom of Belgium that is the area north of the linguistic frontier which runs east west through Belgium passing slightly south of Brussels For the modern period this definition is clear enough but for former times it needs some explanation What do we mean for example when we use the term Dutch for the medieval period In the Middle Ages there was no standard Dutch language and when the term Dutch is used in a medieval context it is a kind of collective word indicating a number of different but closely related Frankish dialects The most important of those were the dialects of the duchies of Limburg and Brabant and of the counties of Flanders and Holland **Schrijverstypen** Erica van Boven, Pieter Verstraeten, 2016 In Schrijverstypen passeren schrijvers uit de
