The Group in Society John Gastil, 2010 The Group in Society meets the challenges of teaching courses on small groups by revealing the full complexity of small groups and their place in society It shows students the value of learning how to carefully study a group's history and context rather than merely learning a fixed set of group participation skills This text brings together disparate theories and research from communication social psychology organizational and managerial studies and sociology in a way that helps students make sense of a complex body of scholarship on groups Features examples include the powerful group bonds of the modern terrorist cell the wired network of groups in the anti Globalization movement and the deliberation of a jury in a murder trial Teaching a sample course schedule Embedded Systems Framework PowerPoint slides group project assignments group project worksheets and a group project description and contract and links to useful Web resources such as small group teaching resources and active wikis on small groups An open access student study site at www.sagepub.com/gastilstudy features e flashcards practice quizzes and other resources to help students enhance their comprehension and improve their grade **New Directions in Group Communication** Lawrence

R. Frey, 2002 *New Directions in Group Communication* takes as its mission the setting of the agenda for the study of group communication in the future. It does so by presenting work that scholars have not previously explored in the current small group communication literature. Part I focuses on new theoretical and conceptual directions both presenting new views and extending current positions. Part II examines new research methodologies while Part III looks at antecedent factors affecting group communication. Parts IV and V of the text provide insight into both group communication process and practices. Part VI covers different group communication contexts including communication patterns in top management teams. *Handbook of Emergent Methods* Sharlene Nagy Hesse-Biber, Patricia Leavy, 2013-10-15 Social researchers increasingly find themselves looking beyond conventional methods to address complex research questions. This is the first book to comprehensively examine emergent qualitative and quantitative theories and methods across the social and behavioral sciences. Providing scholars and students with a way to retool their research choices, the volume presents cutting edge approaches to data collection, analysis, and representation. Leading researchers describe alternative uses of traditional quantitative and qualitative tools, innovative hybrid or mixed methods, and new techniques facilitated by technological advances. Consistently formatted chapters explore the strengths and limitations of each method for studying different types of research questions and offer practical in-depth examples. Multiteam Systems Stephen J. Zaccaro, Michelle A. Marks, Leslie DeChurch, 2012-05-22 This book examines an emerging organizational form called the multi team system (MTS). This type of aggregation is being increasingly adopted by organizations and agencies that need to respond to complex strategic problems. There has been increasing interest in MTSs over the last decade to the point where there is now a need to describe these organizational forms more fully, build conceptual frames that can guide research, and begin developing tools to improve the study of MTSs. The purpose of this book is to respond to these needs. The book contains a series of chapters that expand prior conceptual frames of MTSs, defining in more detail the compositional and linkage attributes that characterize such units. The book also explores how such systems emerge and develop as well as the methods for studying MTSs. The intent of the book is to establish and nurture a strong conceptual and methodological foundation that can guide research and practice with MTSs. Because the notion of MTSs cuts across multiple domains, this book will interest scholars in industrial organizational psychology, organizational science, management, and organizational theory, human factors, sociology, organization communications, and public administration. **Virtual Work and Human Interaction Research** Long, Shawn, 2012-04-30 *Virtual Work and Human Interaction Research* uses humanistic and social scientific inquiry to explore how humans communicate, behave, and navigate in their new virtual work spaces, providing scholars and practitioners an opportunity to study virtual work from quantitative and qualitative research approaches. The book explores informal and formal communication, emotional, psychological, and physical labor, rewarding and punishing virtual work behaviors, group decision making, socializing, and organizational change in a workplace without the physical and nonverbal cues that are taken

for granted in traditional face to face work arrangements *Creative Strategies for Conflict Management & Community Building* Christian Ndubueze Anyanwu, 2009-11 This book in applying the asset mapping theory of Kretzmann and McKnight 1993 developed a positive communication strategy for minimizing conflicts and building a more Collaborative Communities in Organizations and Churches with much emphasis on inclusivity consensus and commitment to common vision and ideals While critically reviewing the traditional conflict theories in their approaches to conflict management the book uses the new lens provided by the asset mapping theory to recommend for a paradigm shift in the way people look at organizations and conflicts A new emphasis therefore is on the positive elements in organizations the assets that lie within individuals and groups as the key to minimizing conflict in organizations Besides unlike the traditional conflict theories which sees conflict as a problem this new lens sees conflict within organizations as functional and opportunities for growth The book equally identifies some of the significant factors that cause ethnic conflicts within organizations such as Prejudices among Ethnic Groups Differences of Ethnic Groups Power Struggle among Ethnic Groups Discrimination and Injustice against Groups Lack of Participatory Communication and Lack of Participatory Leadership Finally in reviewing the relevant literatures on Community Building the book underlines the various variables that make Community Building possible Such variables include Discovering and Mobilizing the Assets of Individuals and Groups within Organizations Building Relationships among Individuals and Groups within Organizations Building a more Participatory Leadership within Organizations Building a more Participatory Communication within Organizations Creating more Awareness on the necessity of Collaborative Initiatives as well as Promoting the Common Cultural Values and Ideals that holds Individuals and Groups together within Organization

The Fundamentals of Small Group Communication Scott A. Myers, Carolyn M. Anderson, 2008-01-17 From the Publisher With a focus on the individual group member The Fundamentals of Small Group Communication encourages readers to reflect on how their communication behaviors and practices contribute to their current small group experiences In this easy to read text authors Scott A Myers and Carolyn M Anderson introduce students to the fundamental issues faced by all small groups such as socialization development ethics and diversity and the procedures utilized by effective small groups The book is organized around three overarching themes characteristics of small group communication and the individual group member the group task and group member relationships Each chapter opens with a case study and includes an Ethically Speaking box that allows readers to reflect on how ethics is central to the small group communication process It is intended for undergraduate courses that introduce students to the basic fundamentals of small group communication

Parents and Children Communicating with Society Thomas J. Socha, Glen Stamp, 2010-03-17 The volume opens a new frontier in parent child communication research as it brings together veteran researchers and newcomers to explore the communication of parents and children as they create relationships outside the family The chapters herein examine communication processes and problems of parents and children as they interact with childcare healthcare education and

youth sports investigate the unique challenges facing various types of families as they communicate outside the family e.g. stepfamilies and gay lesbian bisexual families and consider the role of media in family relationships outside of home The primary audiences for the volume includes scholars researchers and graduate students studying communication in families children s communication communication in personal relationships organizational communication group communication and health communication It will also be of interest to psychologists who study families children and organizations sociologists who study families children and organizations education researchers teachers coaches family physicians and family therapists graduate students It has the potential for use in courses in family communication family studies family sociology and child development

Communication in Construction Teams Stephen Emmitt, Christopher Gorse, 2006-09-27 Construction teams are usually complex interdisciplinary and temporary and as such the need for effective communication is crucial However published data regarding the manner in which individuals interact within the temporary project team is scarce with little other than anecdotal evidence available Recognizing this gap Communication in Construction Teams provides a comprehensive overview of the literature on interpersonal communication and delivers a critical review of various research methods previously used in and outside the construction management field Making use of Bales interaction process analysis IPA a tool used successfully in many fields to collect interaction data the text investigates the link between successful projects and the effectiveness of communication finding that participants in the construction process exhibit regular patterns of interaction and most significantly that there are different patterns of interaction associated with successful and unsuccessful projects Putting forward a number of practical suggestions to assist all actors involved in construction projects this insightful publication will be of interest to researchers in the fields of building design and construction management

Organizational Communication Theory and Research Vernon D. Miller, Marshall Scott Poole, 2024-07-01 The Handbook of Organizational Communication Theory and Research offers concise but thorough reviews of important research on traditional and emerging areas in organizational communication Section One Theory and Methods provides an overview of the field s history prominent theories and methodologies Section Two Processes focuses on primal processes such as leadership organizational entry conflict power and inclusion Section Three Contexts focuses on the settings where organizational communication occurs including teams and workgroups networks and organizational structure Section Four Technology considers the development and introduction of new media and intelligent technologies into organizations The final section Emerging Areas addresses communication issues associated with changing environmental social and political upheavals including wellness corporate social responsibility and crisis response The Handbook of Organizational Communication Theory and Research covers topics of pressing interest to current scholars and practitioners many of which have not been addressed in previous handbooks

Theories of Team Cognition Eduardo Salas, Stephen M. Fiore, Michael P. Letsky, 2013-06-17 Cognitive processes in teams have been a valuable arena for team researchers to explore

Team cognition research advances and informs a variety of disciplines including cognitive and social sciences engineering military science organizational science human factors medicine and communications There has been a great deal of progress in the team cognition literature yet the field is still in its early stages of maturity There is much more to be gained from the field s insights and there is a need to unite the diverse array of scholarly ideas that permeate the field This movement will serve to organize the research and ideas that have surfaced in the field thereby making them more accessible to different disciplines while at the same time motivating continued progress in the field This book aims to be a step in this direction and acts as a forum for leading scholars to share their ideas theories models and conceptions about what matters and where more attention is needed in the field of team cognition Construction Communication Stephen Emmitt, Christopher A.

Gorse, 2009-02-12 Communicating the design intent from initial briefing through the design stage and on to the actual construction is vital to the success of any building project This book looks at communication across physical organisational and cultural barriers with a view to improving the design and construction process The authors investigate communication issues across physical organisational and cultural barriers and present clear guidance and practical advice **Virtual**

Communities: Concepts, Methodologies, Tools and Applications Management Association, Information

Resources, 2010-10-31 Covers the development design and utilization of virtual organizations and communities and the resulting impact of these venues **Group Communication in Context** Lawrence R. Frey, 2005-05-18 The study of group

communication has never been more critical as recent national and international events point to the fragility of group life An emerging perspective the bona fide group perspective offers hope for improving group communication for it recognizes that any group a family community group expedition team social support group organizational work group interorganizational collaboration or international team must be studied and understood within the multiple contexts in which it is embedded and that significantly affects who is considered to be part of a group what occurs within that group and how that group interacts with other groups In the second edition of his award winning volume editor Lawrence R Frey showcases original research studies conducted on and about communication in bona fide groups demonstrating the conceptual promise of the bona fide group perspective as realized in research practice Divided into six sections the chapters cover a wide range of new or relatively understudied groups including youth community groups Internet support groups climbing expedition groups families neighborhoods and school boards and demonstrate the wealth of methodological approaches that can be used to study bona fide group communication including survey methods interviews textual analysis content analysis participant observation and discourse analysis **Group Communication in Context Studies of Bona Fide Groups Second Edition** shows that the bona fide group perspective has the power to transform our thinking about groups and group communication and in time the practices in which groups and group members engage The volume is intended for use in group communication courses as well as a reference for group scholars It is also appropriate for classes in psychology social work counseling sociology

anthropology and related disciplines **Disciplines, Disasters and Emergency Management** David A. McEntire, 2007
Disasters such as the 9 11 terrorist attacks the Indian Ocean Tsunami and Hurricane Katrina illustrate the salience and complexity of disasters Both scholars and practitioners therefore agree that we must take a more proactive and holistic approach to emergency management which should logically be derived from a sound understanding of the academic literature and the most pressing concerns facing professionals in the field today Disciplines Disasters and Emergency Management reviews what is known about catastrophic events from the standpoint of various academic areas of study The introduction Online Consumer Psychology Curtis P. Haugtvedt, Karen A. Machleit, Richard Yalch, 2005-03-23 Addresses many of the issues created by the Internet and goes beyond the topic of advertising and the web to include topics such as customization site design word of mouth processes and the study of consumer decision making while online
