Collaborative Approaches to Recruiting, Preparing, and Retaining Teachers for the Field Peterson-Ahmad, Maria, Luther, Vicki L., 2022-01-07 Teacher retention is an area of great concern across the globe as it appears many teachers leave the field after only a few years especially those serving low income students There is a growing gap from preparation to practice Not only must educator preparation programs EPPs be diligent in utilizing systematically effective methods of preparing novice teachers but schools must also be cognizant of the need for continued mentorship and quality professional development that matches the unique needs of their novice teachers When novice teachers enter the profession they must be offered explicit and scaffolded opportunities for continued learning in order to bridge the theoretical aspects of teaching learned in a preparation program to the practical application of a classroom school setting as these opportunities differ from the needs of veteran teachers *Collaborative Approaches to Recruiting Preparing and Retaining Teachers for the Field* provides a collection of theoretical application and research based information regarding a variety of viewpoints and strategies that educator preparation programs must be cognizant of in order to meet the varied and individualized needs of novice teachers so that the academic behavioral and or social emotional needs of their students are effectively supported Overall this book recognizes the constant need for improvement within educator preparation programs and school systems showcases that teacher retention is a concern across the United States and globally and shows how educator preparation programs and schools districts must reach across the boundaries of content specificity and collaborate to prepare teacher candidates most effectively Covering topics such as teacher retention collaborative partnerships and growth mindset this book is essential for educational preparation faculty educational leadership faculty P 12 general and special education teachers administrators government officials pre service teachers students researchers and academicians [Helping Children Learn Mathematics](#)
