Technical Manual United States. War Department, 1945 **CRASH3 User's Guide and Technical Manual**, 1981 **Technological Change and the Environment** Arnulf Grübler, 2010-09-30 Much is written in the popular literature about the current pace of technological change But do we have enough scientific knowledge about the sources and management of innovation to properly inform policymaking in technology dependent domains such as energy and the environment While it is agreed that technological change does not fall from heaven like autumn leaves the theory data and models are deficient The specific mechanisms that govern the rate and direction of inventive activity the drivers and scope for incremental improvements that occur during technology diffusion and the spillover effects that cross fertilize technological innovations remain poorly understood In a work that will interest serious readers of history policy and economics the editors and their distinguished contributors offer a unique single volume overview of the theoretical and empirical work on technological change Beginning with a survey of existing research they provide analysis and case studies in contexts such as medicine agriculture and power generation paying particular attention to what technological change means for efficiency productivity and reduced environmental impacts The book includes a historical analysis of technological change an examination of the overall direction of technological change and general theories about the sources of change The contributors empirically test hypotheses of induced innovation and theories of institutional innovation They propose ways to model induced technological change and evaluate its impact and they consider issues such as uncertainty in technology returns technology crossover effects and clustering A copublication of Resources for the Future RFF and the International Institute for Applied Systems Analysis IIASA *Technical Abstract Bulletin* Defense Documentation Center (U.S.), 1964

Coping with Uncertainty Kurt Marti, Yuri Ermoliev, Marek Makowski, Georg Pflug, 2006-11-23 Ongoing global changes

pose fundamentally new scientific problems requiring new concepts and tools A key issue concerns a vast variety of practically irreducible uncertainties which challenge traditional models and require new concepts and analytical tools Uncertainty can dominate as in the climate change debates Increasing the resolution of models does not always yield sufficient certainty This book presents much needed new tools for modeling and management of uncertainty

Ship-Shaped Offshore Installations Jeom Kee Paik, Anil Kumar Thayamballi, 2007-01-15 Ship shaped offshore units are some of the more economical systems for the development of offshore oil and gas and are often preferred in marginal fields These systems are especially attractive to develop oil and gas fields in deep and ultra deep water areas and remote locations away from existing pipeline infrastructures Recently the ship shaped offshore units have been applied to near shore oil and gas terminals This 2007 text is an ideal reference on the technologies for design building and operation of ship shaped offshore units within inevitable space requirements The book includes a range of topics from the initial contracting strategy to decommissioning and the removal of the units concerned Coverage includes both fundamental theory and principles of the individual technologies This book will be useful to students who will be approaching the subject for the first time as well as designers working on the engineering for ship shaped offshore installations

Mixed Integer Nonlinear Programming Jon Lee, Sven Leyffer, 2011-12-02 Many engineering operations and scientific applications include a mixture of discrete and continuous decision variables and nonlinear relationships involving the decision variables that have a pronounced effect on the set of feasible and optimal solutions Mixed integer nonlinear programming MINLP problems combine the numerical difficulties of handling nonlinear functions with the challenge of optimizing in the context of nonconvex functions and discrete variables MINLP is one of the most flexible modeling paradigms available for optimization but because its scope is so broad in the most general cases it is hopelessly intractable Nonetheless an expanding body of researchers and practitioners including chemical engineers operations researchers industrial engineers mechanical engineers economists statisticians computer scientists operations managers and mathematical programmers are interested in solving large scale MINLP instances

Packaging of Pharmaceuticals and Healthcare Products Frank A. Paine, H. Lockhart, 2012-12-06 As was the case with Charles Ross's Packaging of Pharmaceuticals published by the UK Institute of Packaging in 1975 it is assumed that the reader of this book already has a broad understanding of the basics of packaging If not the Packaging Users Handbook and the Handbook of Food Packaging are recommended The packaging needs of pharmaceuticals are different in degree only from those of other perishable products such as processed foods Because the required action of a medication can be nullified by any deterioration in its active principles the protection required from its packaging is at least an order of magnitude greater than that needed by foods for example Functional efficiency is therefore of prime importance Conversely the need for the

packaging to sell the medication is much less hence the graphics required need only provide the right image for the product when presented for use in hospital or surgery Even when on sale at the pharmacy the appeal required is that of providing hygiene and confidence more than anything else Thus the textual requirements are paramount including traceability batch numbers date coding etc in case of recall while striking appearance to attract customer attention is in lower key And with the increase in malicious tampering nowadays recall is more frequent
