Essential Renewal of America's Schools Carl Glickman, Ian M. Mette, 2020 What can educational leaders do to create schools that are purposeful, moral, and successful? This book outlines a practical framework to replace dependence on top-down state and federal regulations with locally guided initiatives to address local goals. Building on Glickman's classic *Renewing America's Schools*, this resource is for anyone involved with school change in today's complex times.

Self-management and Leadership Development Mitchell Grant Rothstein, Ronald J. Burke, 2010-01-01 This book is based on a really important, timely, and relevant idea to bring together sources on the self-management of leadership development.

The book is important because almost all leadership development relies to a great degree on the leader's capability to manage his or her personal development. It is timely because there is currently no single volume that covers the topic and it is relevant because leadership is such an extremely important issue for the success of our organizations, countries, and society in general. The editors have done a thoroughly professional job in identifying top quality authors and combining their contributions into a very worthwhile volume.

Ivan Robertson, University of Leeds, UK, *Self Management and Leadership Development* offers a unique perspective on how leaders and aspiring leaders can and should take personal responsibility for their own development. This distinguished book is differentiated from other books on this topic with its view on the instrumental role played by individuals in managing their own development rather than depending on others such as their organization to guide them. Expert scholars in the area of leadership emphasize the importance of self-awareness as the critical starting point in the process. Explicit recommendations are provided on how individuals can manage their own self-assessment as a starting point to their development. The contributors present insights and practical recommendations on how individuals can actively self-manage through a number of typical leadership challenges.

Business school faculty teaching electives in leadership and managers who engage in leadership development for themselves or others should not be without this important resource. Consulting firms and training institutions offering leadership development programs and participants in MBA and executive development programs will also find it invaluable.

Leadership and Power in International Development Randal Joy Thompson, Julia Storberg-Walker, 2018-10-24. Leaders present lessons learned, strategies, challenges, and successes in easy-to-read narratives highlighting their diverse experiences with context, culture, power, gender, and sustainability.

Inspiring Leaders Ronald J. Burke, Cary Cooper, 2006-09-27. We exist in an era of great change and widespread uncertainty in which course-determining decisions lie with organizational leaders. In this continually shifting climate, we require their courage to take action. Billions of dollars are spent annually on developing leaders, yet despite these efforts, most organizations report a shortage of leaders, a leadership gap, and estimates of leadership failures approach fifty per cent. Authored by some of the best names in the subject area, this book addresses this issue and provides readers with an innovative approach to learning leadership skills, merging theory with practice to enable a better understanding of this complex and significant subject. It emphasizes a balance of skills, the critical role of feedback in learning and development, and innovative thoughts on developing women leaders. Taking an international perspective, this outstanding text will be an invaluable resource for those studying leadership, organizational behaviour, and human resource management, as well as those on specialist masters and MBA courses, and will be especially useful for those undertaking the difficult task of leading within organizations.
