STEM Activity Book: Science Technology Engineering Math Catherine Bruzzone, Sam Hutchinson, Jenny Jacoby, 2018-08-07. The acronym STEM stands for Science Technology Engineering and Math. These subjects are closely related to one another and are sometimes overlooked as critical subjects in education, often dismissed by students and teachers after primary education is completed. However, the need for these subjects in our society is crucial. The aim of this book is to pique the interest of children in these areas of study, stress the importance of these subjects, and help encourage children who are interested to continue within these fields as they grow and learn. Whether it's through marvelous mazes, puzzles, testing quizzes, and other fun activities, this book introduces children to the inner working of the world around them and might even one day inspire them to contribute an invention or a theory of their own.

Fearless Firsts: Geniuses Who Changed How We Live James Buckley Jr., Ellen Labrecque, 2026-04-07. Celebrate 50 geniuses who broke barriers, took risks, and changed our world forever. While these scientists, engineers, and more came from different backgrounds and overcame unique struggles, they had one thing in common: they would not take "You can't" for an answer. With a "don't give up" attitude, these fearless firsts fought for what they believed in and created a better world for all of us. In this book, you'll read about people you might have heard of before, like George Washington Carver and Amelia Earhart. You'll also discover the first scientists to figure out how dinosaurs went extinct, the man who brought the yo-yo to the U.S., and the first blind person to use sound to study space. You'll meet the first American woman to program a computer, the first Black person to earn a patent, and the first Latina to be the U.S. Surgeon General. By the time you're done reading, you'll be inspired to stay curious, solve hard problems, and be fearless in whatever you do.
