**The Dynamics of the Language Classroom** Ian Tudor,2001      Language Learning Beyond the Classroom David Nunan,Jack C. Richards,2015-01-30 This volume presents case studies of language learning beyond the classroom The studies draw on a wide range of contexts from North and South America to Europe and the Asia Pacific region Each provides principled links between theory research and practice While out of class learning will not replace the classroom ultimately all successful learners take control of their own learning This book shows how teachers can help learners bridge the gap between formal instruction and autonomous language learning Although English is the primary focus of most chapters there are studies on a range of other languages including Spanish and Japanese

**Process and Experience in the Language Classroom** Michael Legutke,Howard Thomas,Christopher N. Candlin,2014-06-06 Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources Building on a critical review of recent language teaching principles and practice they provide selection criteria for classroom activities based on a typology of communicative tasks drawn from classroom experience The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum

Understanding Language Classroom Contexts Martin Wedell, Angi Malderez, 2013-04-11 Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of implementation contexts Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed
