School Mathematics Curricula Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26

This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum and teachers' professional development, which are of interest to a wide international audience.

Becoming a Teacher: Knowledge, Skills and Issues Maggie Clarke, Sharon Pittaway, 2014-04-23. Marsh's *Becoming a Teacher 6e* continues to offer pre-service teachers a practical and user-friendly guide to learning to teach that students find invaluable throughout their entire degree. Marsh covers a comprehensive introduction to teaching methodology, preparing pre-service teachers for the challenges they face in a 21st century classroom. All chapters in this new edition have been updated with new approaches and current references by the two new authors, Maggie Clarke and Sharon Pittaway. The approach in this 6th edition is more reflective and gives readers an even greater opportunity to interact with issues raised in the text.

The Oxford Handbook of Special Music Education and Music Therapy Kimberly A. McCord, Cynthia Colwell, Deborah VanderLinde, 2025-11-07. School music teachers have always taught students with disabilities in their classes and ensembles, and occasionally school music therapists and teachers will collaborate. More often than not, music educators are unaware that their students are receiving music therapy. This handbook addresses this issue in both research and practice by bringing together the complementary fields of Music Therapy and Special Music Education, the latter still a relatively new field but growing in research output and interest. With a focus on school music education, early childhood through grade 12, the twenty-six chapters in this handbook offer a range of discussions by leaders in the fields of music education and music therapy on topics such as theoretical models of disability, ablism in music therapy, intercultural music learning in special education, Universal Design for Learning, music therapy for the whole school community, and more. Many chapters provide descriptions of successful programs in music therapy and special music education around the world. Taken as a whole, *The Oxford Handbook of Special Music Education and Music Therapy* is a collaboration between the two fields for the benefit of children of all ages, their teachers, and their music therapists.

Teaching Dance as Art in Education Brenda Pugh McCutchen, 2006. Brenda McCutchen provides an integrated approach to dance education using four cornerstones: dancing and performing, creating and composing, historical and cultural inquiry, and analysing and critiquing. She also illustrates the main developmental aspects of dance.

Developing Mathematical Literacy in the Context of the Fourth Industrial Revolution Espinosa, Edgar Oliver Cardoso, 2021-03-12. In the context of the Fourth Industrial Revolution, a world of continuous alterations is glimpsed where science and technology are at the base of economic competitiveness and where innovation plays a strategic role in global competition so that they are

forced to cover a series of requirements to compete successfully in an increasingly globalized economy including high investments in both education and research. Along these lines, the formation of mathematical learning is important because it is oriented towards the development of a set of skills with the aim of resolving situations of daily and professional lives. It focuses on the acquisition of employing the different ways of representing information in the form of models, constructions and graphs to determine the best decision making. In this sense, it includes the mastery of the handling of numbers, measures and structures to carry out the interpretation of operations and representations of a quantitative nature on personal and professional situations. For a society to favor innovation, the use of mathematical information is an essential condition that allows the development of creativity and analysis of information. Mathematics education plays a vital role in this development. Developing Mathematical Literacy in the Context of the Fourth Industrial Revolution studies the formation of mathematical abilities in the context of the Fourth Industrial Revolution regarding its development of both teaching and learning strategies as well as the use of ICT and its use in the development of this discipline in students. It is important that teachers of any educational level reorient their teaching strategies and their role as educators. Therefore, the chapters discuss up to date and relevant information on teaching and didactic tasks in the subject of mathematics. This book highlights mathematical pedagogies, ICT in mathematics learning, teacher training and classroom strategies for mathematics. It is intended for teachers, pedagogical advisors, business trainers, higher education staff, administrators, teacher educators, practitioners, stakeholders, researchers, academicians and students interested in mathematical literacy in the fourth industrial revolution.

New Perspectives on the Development of Communicative and Related Competence in Foreign Language Education Izumi Walker, Daniel Kwang Guan Chan, Masanori Nagami, Claire Bourguignon, 2018-08-21. Nearly half a century has passed since Hymes proposed the concept of communicative competence to describe the knowledge and skills required for the appropriate use of language in a social context. During these decades, a number of scholars have applied and refined this concept. In language education, communicative competence has been identified as a major objective of learning. This book will inform readers about communicative competence as a highly complex construct encompassing an array of sub-competencies such as linguistic skills and proficiencies, knowledge of socio-cultural and socio-pragmatic codes and the ability to engage in textual and conversational discourse. Findings from research in related disciplines have pointed to the significance of factors that can contribute to the attainment of communicative competence. Various teaching practices and relevant information and Communication Technology (ICT) tools will be also introduced and discussed to achieve communicative competence as a complex ability. It is a timely contribution to current research on key areas in the teaching, learning and acquisition of second foreign languages.
