Technical Manual United States Department of the Army,1955 *Lost in Space Technical Manual* Richard R. Messmann,1987-06-01 **Technical Manual** United States. War Department,1962 **Lost in Space Technical Manual** James Van Hise,1987 Describes how the monsters spacecraft planets and special effects were designed for the science fiction television show *Lost in Space* **Highway Capacity Software User's Manual** ,1986 *Warped Space* Anthony Vidler,2002-02-22 How psychological ideas of space have profoundly affected architectural and artistic expression in the twentieth century Beginning with agoraphobia and claustrophobia in the late nineteenth century followed by shell shock and panic fear after World War I phobias and anxiety came to be seen as the mental condition of modern life They became incorporated into the media and arts in particular the spatial arts of architecture urbanism and film This spatial warping is now being reshaped by digitalization and virtual reality Anthony Vidler is concerned with two forms of warped space The first a psychological space is the repository of neuroses and phobias This space is not empty but full of disturbing forms including those of architecture and the city The second kind of warping is produced when artists break the boundaries of genre to depict space in new ways Vidler traces the emergence of a psychological idea of space from Pascal and Freud to the identification of agoraphobia and claustrophobia in the nineteenth century to twentieth century theories of spatial alienation and estrangement in the writings of Georg Simmel Siegfried Kracauer and Walter Benjamin Focusing on current conditions of displacement and placelessness he examines ways in which contemporary artists and architects have produced new forms of spatial warping The discussion ranges from theorists such as Jacques Lacan and Gilles Deleuze to artists such as Vito Acconci Mike Kelley Martha Rosler and Rachel Whiteread Finally Vidler looks at the architectural experiments of Frank Gehry Coop Himmelblau Daniel Libeskind Greg Lynn Morphosis and Eric Owen Moss in the light of new digital techniques that while relying on traditional perspective have radically transformed the composition production and experience perhaps even the subject itself of architecture **The Economics of Space Sustainability Delivering Economic Evidence to Guide Government Action** OECD,2024-06-28 Earth's orbits are polluted by more than 100 million debris objects that pose a collision threat to satellites and other spacecraft The risk of perturbing highly valuable space based services critical to life on Earth such as weather monitoring and disaster management is making debris mitigation an urgent policy challenge This book provides the latest findings from the OECD project on the economics of space sustainability which aims to improve decision makers understanding of the societal value of space infrastructure and costs of space debris It provides comprehensive evidence on the growth of space debris presents methods to evaluate and quantify the value of the satellites at risk and discusses ways to ensure a more sustainable use of the orbital environment It notably includes case studies from Italy Japan and Korea on the socio economic value of different types of space infrastructure and discusses the feasibility and optimal design of fiscal measures and voluntary environmental rating schemes to change operator behaviour This work is
