Technoromanticism Technoromanticism:

Technoromanticism Richard Coyne, 1999 The author explores the spectrum of romantic narrative that pervades the digital age from McLuhan's utopian vision of social reintegration by electronic communications to the claims of cyberspace to offer new realities Populating these narratives are cyborgs computerized agents avatars and characters that have putative digital identities

Romantic Futures Evy Varsamopoulou, 2023-12-15 Romantic Futures is a collection which explores the significance of futurity in British Romanticism from a comparative perspective in three defining manifestations the future as conscious legacy by which is meant both influences or continuities and the anticipations of impact on the future the future as revealed by prophecy whether via religious figures or superstitions and a meditation on the temporality of the future or the future as a concept The book brings together a wide range of theoretical and disciplinary perspectives from utopian studies history religion and cultural theory to future studies neuroscience video games and art history Aiming to increase and diversify current critical engagement and highlight the contemporary relevance of the Romantics multivalent preoccupation with the future this collection renews the dialogue between Romanticism and our critical relation to its contemporaneity especially as it speaks to current understandings of the future in the sciences arts and humanities

Pluralist Desires Philipp Löffler, 2015 Excavates the contemporary revival of 19th century cultural pluralism revealing how American novelists since the 1990s have appropriated the historical novel in the pursuit of selfhood rather than truth fundamentally repositioning the genre in American culture

New Romantic Cyborgs Mark Coeckelbergh, 2017-02-24 An account of the complex relationship between technology and romanticism that links nineteenth century monsters automata and mesmerism with twenty first century technology's magic devices and romantic cyborgs Romanticism and technology are widely assumed to be opposed to each other Romanticism understood as a reaction against rationalism and objectivity is perhaps the last thing users and developers of information and communication technology ICT think about when they engage with computer programs and electronic devices And yet as Mark Coeckelbergh argues in this book this way of thinking about technology is itself shaped by romanticism and obscures a better and deeper understanding of our relationship to technology Coeckelbergh describes the complex relationship between technology and romanticism that links nineteenth century monsters automata and mesmerism with twenty first century technology's magic devices and romantic cyborgs Coeckelbergh argues that current uses of ICT can be interpreted as attempting a marriage of Enlightenment rationalism and romanticism He describes the romantic dialectic when this new kind of material romanticism particularly in the form of the cyborg as romantic figure seems to turn into its opposite He shows that both material romanticism and the objections to it are still part of modern thinking and part of the romantic dialectic Reflecting on what he calls the end of the machine Coeckelbergh argues that to achieve a more profound critique of contemporary technologies and culture we need to explore not only different ways of thinking but also different technologies and that to accomplish the former we require the latter

Metamorphoses of

(New) Media Julia Genz, Ulrike K  chler, 2016-01-14 The current success story of new media and the ongoing digitalisation of our world provide an illuminating starting point for the discussion of the powerful revolutions in our media and media uses initiated by the introduction of a ny new medium how do new media evolve and how do they relate to established old media and media uses What does the rise of new media and media uses imply for other discourses And not least which methodological and theoretical approaches help us to understand these developments Metamorphoses of New Media offers an international and interdisciplinary range of studies on these questions In examining the effects of new media and media uses in fields such as social discourse transmediality and aesthetics the essays in this collection engage with a great variety of examples from political debate on Twitter to digital storytelling and the game like experience of DVDs What these diverse perspectives share however is an approach to Metamorphoses of New Media as an ongoing recursive process of change that initiates dialogue and casts light on existing discursive medial and aesthetic models **Sacred Reality, Digital Simulation**

Enrico Beltramini, 2025-07-29 This study explores the relationship between the sacred and the virtual emphasizing the sacred as a divinely dependent consecrated space activated through ritual mediating between the profane and the holy The central argument is that the virtual is fundamentally incompatible with the ritual form a concept developed by Romano Guardini and others including Joseph Ratzinger which holds that the sacred is not merely acknowledged but made present through ritualized actions that require tangible participatory engagement Even if the virtual realm were acknowledged as real and retained both the bodily presence of the faithful and the Divine Presence the rite would still be ineffective Virtuality prevents the proper enactment of the rite rendering it ineffective At its core the ritual form is performative embodied and consecratory It requires physical presence material elements and a structured sequence of gestures symbols and words that together make the divine encounter possible Their absence in virtual spaces disrupts ritual form compromising its sacramental function **Law and Culture in the Age of Technology**

Daniela Carpi, 2022-06-21 Scientific experiments and medical improvements in recent years have augmented our bodies made them manipulable our personal data have been downloaded stored sold analyzed and the pandemic has given new meaning to the idea of virtual presence Such phenomena are often thought to belong to the era of the posthuman an era that both promises and threatens to redefine the notion of the human what does it mean to be human Can technological advances impact the way we define ourselves as a species What will the future of humankind look like These questions have gained urgency in recent years and continue to preoccupy cultural and legal practitioners alike How can the law respond and adapt to a world shaped by technology and AI How can it ensure that technological developments remain inclusive while simultaneously enforcing ethical limits to its reach The volume explores how fictional texts whether on the page or on screen negotiate the legal dilemmas posed by the increasing infiltration of technology into modern life **Proceedings of The 7th International Conference on Contemporary Education, Social Sciences and Humanities (Philosophy of Being Human as the Core of Interdisciplinary**

Research) (ICCESSH 2022) Olga Chistyakova,Iana Roumbal,2023-02-10 This is an open access book The aim of the Conference is to provide a shared platform for academics scholars PhD students and graduate students with different cultural backgrounds to present and discuss research developments and innovations in the fields of contemporary education social sciences and humanities are referred with the understanding of the Human being Papers concerning education philosophy philosophical anthropology sociology theory and history of culture epistemology religions ethics are strongly related with analyzing of the Human being will be considered Interdisciplinary approach and comparative perspective are encouraged
