## **The Final Theory Rethinking Our Scientific Legacy:**

**The Final Theory** Mark McCutcheon, 2010 A key unresolved issue lies at the heart of our science the quest of Aristotle Newton Einstein Hawking and many others now widely known as the Theory of Everything This ultimate understanding is expected to transform science and resolve its many mysteries all via one single overlooked principle in nature that will explain simplify and unify everything This quest has produced theories such as Special Relativity General Relativity and Quantum Mechanics enormous investments in powerful particle accelerators and space telescopes and such recent pursuits as Dark Matter and Dark Energy But enormous problems remain these theories projects and pursuits are all completely separate and frequently incompatible presenting unresolved abstractions speculation paradoxes and mysteries that often even violate our laws of physics upon closer examination As a result the Theory of Everything continues to elude us with no clear way forward The Final Theory clearly shows why this is the case exposing centuries of well intentioned but misguided scientific thought that has locked us into an erroneous and highly troubled energy based science that has taken us far off track It corrects the errors in our scientific legacy showing that energy is actually a misunderstanding of the unifying principle we have sought for centuries a principle that is active all around us producing all known phenomena such as gravity light electricity and magnetism This new understanding replaces both Newton's gravitational force theory and Einstein's warped space time General Relativity Theory while also overturning such theories as Special Relativity and Quantum Mechanics In their place is a single simple principle that finally demystifies explains and unifies everything Read The Final Theory and judge for yourself whether the Theory of Everything has finally arrived **The Final Theory** Mark McCutcheon, 2010-02-10 [A Gestalt Aether Theory on the Nature of Light and Related Phenomena](#) Dilip D James, Gestalt Aether Theory recognizes that a reality must exist outside of the ordered Universe that we live in but claims that it is a reality that is represented by chaos where anything can and does happen where multiple Universes are possible and where time place and causality have no meaning Gestalt Aether Theory explains physics in terms of the ordered Universe that we live in quantum mechanics and Standard Theory attempt to explain physics in terms of the chaos that exists outside of the ordered universe Take for instance the propagation of light from a point A to a point B situated a hundred meters away Quantum mechanics would have one believe that from the time that light leaves the point of origin to the time that it is detected that it ceases to have a corporeal existence and exists instead as a probability wave function In this state it is everywhere and nowhere at once in order to cover the hundred meters from point A to B it has to first enter into multiple Universes hence the multi verse theory GAT on the other hand explains the propagation of light from A to B in terms that reflect reality According to Gestalt Aether theory light travels through a medium and as a consequence spreads out in accordance with the inverse square law GAT states that light is a wave possessing some of the characteristics of a particle somewhat like the ultrasonic sound waves used in lithotripsy where a sound wave is used to break stones namely a wave that possesses some of the

properties of a particle and can therefore retain its individual energy Identity independently of the intensity of the wave Thus light in GAT Gestalt Aether Theory propagates just as any other wave travelling in a medium It follows the same rules as the waves that are created when a stone is dropped into a pool of water The whole of the ordered Universe including gravity neutrinos radio waves and super conductivity are explained in similar terms *The Spacetime Origin Of the Universe With Visible Dark Matter & Energy* Vladimir Ginzburg,2015-02-10 The Universal Spacetime Theory UST is the main subject of this book It attempts to answer some very interesting questions related to the science and philosophy What is the origin of the Universe How was the Universe created out of nothing What are the structure and properties of ordinary matter that makes up less than 5% of the Universe What are the structure and properties of dark matter that occupies about 27% of the Universe What are the structure and properties of the dark energy that occupies roughly 68% of the Universe Is the communication possible with superluminal velocity **Prime Elements of Ordinary Matter, Dark Matter and Dark Energy - Beyond Standard Model and String Theory** Vladimir Ginzburg,2007-06 This book outlines the history of the vortex theory and its latest development 3D spiral string theory **The 4D Spiral Spacetimes Toryx & Helyx - Prime Elements of the Multiverse** Vladimir Ginzburg,2018-05-25 This book describes abstract and applied mathematics of the unique properties of 4D spiral spacetimes called toryx and helyx There is a good reason for studying the mathematics of these two spacetimes Their unique properties provide them with a capability to be the prime elements of nature In that capacity their potential role in nature would be comparable with a role of the DNA double helixes discovered by James Watson and Francis Crick in 1953 The DNA double helixes contain genetic codes defining the properties of both organic entities and living organisms whereas both toryx and helyx contain generic codes defining the properties of matter and radiation entities of the Universe Also similar are the locations of these codes The genetic codes of DNA are located inside of cells of all organic entities and living organisms whereas the generic codes of toryces and helyces reside inside of all elementary matter and radiation particles the building blocks of the Universe **The Spacetime Origin of the Universe** Vladimir Ginzburg,2013-08-19 This book describes the basic concept of the Universal Spacetime Theory UST During its development I was stimulated by many scientific ideas proposed since the dawn of science that I described briefly in Chapter 1 In the UST these ideas took on a completely new form thanks to my discovery of a spiral string entity that I named the toryx The toryx turned out to be a perfect candidate for a prime element of nature This however was only the tip of the iceberg Besides yielding the unified laws applicable to both micro and macro worlds the toryx helped me to find the answer to the most puzzling question of science *The Unique Properties of 4D Spiral Spacetime: Toryx* Vladimir Ginzburg,2017-08-31 According to the title of this book the toryx is a four dimensional 4D spiral spacetime It means its properties are described by three space plus one time parameters Part 1 of this book presents properties of toryces in abstract mathematical terms Part 2 shows several applications of toryces for mathematical modeling of properties of entities of both micro and macro worlds

This book further confirms a main proposition of the author's Universal Space Theory UST that the torus has all attributes required to be a prime element of nature      **The Worldwide List of Alternative Theories and Critics** Jean de Climont, 2020-11-01 This Worldwide List of Alternative Theories and Critics only available in English language includes scientists involved in scientific fields The 2023 issue of this directory includes the scientists found in the Internet The scientists of the directory are only those involved in physics natural philosophy The list includes 9700 names of scientists doctors or diploma engineers for more than 70% Their position is shortly presented together with their proposed alternative theory when applicable There are nearly 3500 authors of such theories all amazingly very different from one another The main categories of theories are presented in an other book of Jean de Climont THE ALTERNATIVE THEORIES      *Universe Revealed More* Eng. Wasfi A. M. Alshdaifat, 2020-03-15 This book is providing a non preceded simplified knowledge and answers to the big questions for either a normal reader or a scientist It is trying to draw a united scientific picture for the universe shape and movement in whole and part depending on a unified harmony in between the science and the holy books far away from twisting any of them to be coherent with the other The author's innovative capabilities are employed to create design and draw tens of models to shape parts of a picture for a working dynamic universe like a natural machine with threaded parts The book is revealing the mysterious natural shape and expanded logarithmic spiral movement of the universe heavens boundaries since the big fission up to the big rip which affects physically and mechanically on its inner constituents matter and forces formation and movement such as dark matter galaxies stars planets moons electrons gravity electromagnetic waves dark energy etc to be shaped and moved in such a manner which we are discovering and going to discover as a natural fingerprint of the universe moving boundaries or in another way as natural products by the giant universal machine The seven heavens effects on our inner lower universe are discussed thoroughly via the subjects of parallel worlds multiple universes overlapping wavy orbits and higher dimensions
