[Gay Men and Childhood Sexual Trauma](#) James Cassese, 2016-01-20 Learn powerful techniques for healing the scars of early sexual abuse in gay men

The first book of its kind *Gay Men and Childhood Sexual Trauma Integrating the Shattered Self* addresses the specific therapeutic needs of gay men in recovery. All too often gay men hide their childhood memories of being sexually victimized because of fear, shame, and the stigma of stereotypes which equate homosexuality with child abuse. Some gay men may view these histories as rites of passage and dismiss other perspectives as betrayals of their community or inadvertent support for the anti-gay agenda of the religious right. Certain therapists and so-called support groups ridicule them as hysterics with false memories. Groups like the North American Man Boy Love Association or the Rene Guyon Society dismiss the source of their anguish as wishful thinking or a healthy consensual intergenerational romance. Finally, here is a book that addresses the unique emotional and psychological needs of gay male survivors of sexual abuse. *Gay Men and Childhood Sexual Trauma* offers new hope by separating the crime of pedophilia from the consensual intimacy of an adult male same-sex relationship. It provides specific guidance for therapists working with gay men either in individual or group therapy settings and offers practical treatment suggestions as well as moving insights into the painful conflicts gay men may have in accepting their own sexuality and revealing their status as child survivor of an adult sexual predator. *Gay Men and Childhood Sexual Trauma* discusses practical ways to help the survivor heal, including adopting eye movement desensitization and reprocessing techniques to treat traumatized gay men, helping gay men to break the old arousal patterns associated with their abusers, handling survivors' formidable issues of trust, addictions, depression, and low self-esteem, leading survivor groups of mixed sexual orientation, discerning the special meaning of HIV to traumatized gay men, respecting cross-cultural differences in treating the gay male sexual trauma survivor, finding new directions for research. This powerful volume offers sufficient technical detail to be useful for the therapist working with gay men, yet it is written with enough clarity and compassion to be used as bibliotherapy for men just coming out as gay, as survivor, or as both. *Gay Men and Childhood Sexual Trauma* is an essential resource for mental health professionals as well as for gay men who have themselves survived sexual abuse or who love someone who did.

Sociometrics Tian Dayton, 2022-08-30 In *Sociometrics*, Tian Dayton masterfully integrates principles of group dynamics and psychodrama therapies with insights into bodily states and feelings gained from contemporary neuroscience. *Sociometrics* infuses therapeutic principles in an intuitive and functional program that shifts the agent of healing from the therapist to the group. We learn that through sociometrics, the threads of healing are woven as the client experiences a reconnection with the inner self and a connection with others. Stephen W. Porges, PhD, Distinguished University Scientist, Indiana University, Professor of Psychiatry, University of North Carolina, creator of the Polyvagal Theory, Embodied relational processes designed to add experiential therapy into addiction treatment centers, IOPs, and one-to-one or group therapy settings. Relational trauma can cause a loss of connection with the self and impact our ability to engage comfortably in intimate connection with others. Feeling misread, neglected, or abused by the people we want most to be loved by is a traumatizing experience that is cumulative. When these relational wounds remain unseen and unresolved, they can

become the pain pump fueling self medicating and dysfunctional behaviors that silently pass down through generations Sociometrics are embodied research based processes that educate clients about trauma grief and resilience as they offer in the moment experiential relational trauma repair Created by Dr Tian Dayton to fit easily into outpatient programs clinics and one to one settings sociometrics help to take the guesswork out of incorporating experiential therapy into treatment They give therapists a clear process that builds momentum for deep change and personal growth Harnessing the therapeutic power of the group they teach skills of emotional literacy and self and co regulation The combination of sociometrics and simple role plays allow the body as well as the mind to find a voice They draw on the theory base of psychodrama and sociometry the first forms of mind body experiential therapy created by the father of group therapy Jacob Levy Moreno
