Income Investing Explained: Your Questions Answered Henry Mah, 1900 After writing two books about Income Investing I have been contacted regularly by readers with questions and requests for more information It s not often one feels compelled to write a book because of questions from readers but that s exactly how this book came about It s not that readers didn t understand the process I described it s just that people wanted more details had specific suggestions and needed more information about making investing decisions especially during different and difficult market conditions In essence people wanted an advanced outline to build upon the process described in my earlier books So the purpose of this book is not to repeat the process of stock evaluation which is the foundation of my earlier books but to provide further explanations and examples to help when making investing decisions Where to find ideal stocks for Income investing How to determine under valued stocks How many stocks should you hold and in which sectors When to sell even your long time good stocks What happens and how your decisions might change during a market crisis Is it ever too late to start investing for income I ll also introduce a new Excel worksheet to help readers determine under valued or expensive stocks directing you to a new website for obtaining dividend data and even provide a list of 45 Canadian and 35 US stocks from which to begin your selection of quality income growth stocks As always these are my opinions and not professional financial advice So if you have the time and want to learn more let s continue talking about Income Investing

Emotions and Values in Equity Crowdfunding Investment Choices 2 Christian Goglin, 2021-05-04 Equity crowdfunding is a new way for seed stage start ups to generate initial capital and as such raises questions around the choices made by investors within this area Understanding it is important for investor protection as investors are generally unaware of the factors that can influence their decisions However investing in equity crowdfunding places the investor in a unique decision making framework in which resources such as images videos and storytelling are all mobilized by entrepreneurs and platforms as tools of persuasion This context thus seems to favor more holistic and emotional decision making rather than a process that is rational and analytical Volume 1 presents a transdisciplinary theoretical analysis combining different fields within the social sciences primarily finance marketing and psychology In this second volume an explanatory model is developed on the basis of this theoretical framework which is then empirically tested using data from laboratory experiments This book also proposes the original theory of emotional matching which is both justified and substantiated It personalizes behavior and offers a new perspective based on project characteristics and investor preferences
