of the contemporary political scene emphasizing 1 The industry of professional political consulting that has taken over 2 The critical problems that the reliance upon video media have brought to our politics 3 The emphasis on personalities and the relegation of all issues into the deep ruts of unreasoning right and left ideology In the course of the discussion readers can even determine where they might want to weigh in themselves and help change things **The Social Media Bible** Lon Safko, 2012-05-08 The go to guide to social media skills now in an updated and revised Third Edition The Social Media Bible is comprehensive 700 plus page social media resource that will teach corporate small business and non profit marketers strategies for using social media to reach their desired audiences with power messages and efficiency This newly revised 3rd edition addresses technology updates to the iPad apps Foursquare and other geotargeted networks New case studies and company profiles provide practical examples of how businesses have successfully implemented these strategies using the newest social media marketing tools Updates and changes to Google s search engine algorithms More information on plug ins widgets apps and integration Updates on Twitter and Yammer and new information on Google The latest in mobile marketing Master the latest social media tools and deliver powerful messaging in the most effective way possible with The Social Media Bible Social Roots Cindy Gordon, Andrew Weir, 2014-09-30 Social Roots traces the history of a fundamental economic shift that is underway The shift is rooted in virtualization a key innovation factor but when combined with influence networks the significance becomes transformative The combined power of these dimensions is creating a new economic paradigm based on return on collaboration metrics rooted in social capital theory Inside is the story of the near magical transformation written specifically so we do not forget the significance of this decade of leadership in the influence economy Many of the stories in the first part of Social Roots are about organizations that took the opportunity to experiment and experience the power of social networking approaches to conducting business and social innovators striving to make the world a better place Their contributions to creating the influence economy are numerous and their story of how they achieved success creates a tapestry of insight *The PR Knowledge Book* Sangeeta Waldron, 2019-07-31 The PR Knowledge Book is for everyone irrespective of where you are in the world whether a student starting out in this industry self employed a home business small business start up charity or any other type of organization wanting to embark on your PR journey or someone just plain curious about what it entails This book covers everything within the world of PR from how to create a brand how to use social media how to be newsworthy to how to contact the media how to have a global mind set the power of networking and more It is written in an easy style packed with powerful tips proven tools and real life case studies from around the world In 12 chapters you will discover how to get your brand out there so you can attract clients and new business **The Reasonable Robot** Ryan Abbott, 2020-06-25 Argues that treating people and artificial intelligence differently under the law results in unexpected and harmful outcomes for social welfare **Neurobiology of human language and its evolution: Primate and Nonprimate Perspectives** Constance Scharff, Angela D. Friederici, Michael

Petrides, The evolution of human language has been discussed for centuries from different perspectives Linguistic theory has proposed grammar as a core part of human language that has to be considered in this context Recent advances in neurosciences have allowed us to take a new neurobiological look on the similarities and dissimilarities of cognitive capacities and their neural basis across both closely and distantly related species A couple of decades ago the comparisons were mainly drawn between human and non human primates investigating the cytoarchitecture of particular brain areas and their structural connectivity Moreover comparative studies were conducted with respect to their ability to process grammars of different complexity So far the available data suggest that non human primates are able to learn simple probabilistic grammars but not hierarchically structured complex grammars The human brain which easily learns both grammars differs from the non human brain among others in how two language relevant brain regions Broca s area and superior temporal cortex are connected structurally Whether the more dominant dorsal pathway in humans compared to non human primates is causally related to this behavioral difference is an issue of current debate Ontogenetic findings suggest at least a correlation between the maturation of the dorsal pathway and the behavior to process syntactically complex structures although a causal prove is still not available Thus the neural basis of complex grammar processing in humans remains to be defined More recently it has been reported that songbirds are also able to distinguish between sound sequences reflecting complex grammar Interestingly songbirds learn to sing by imitating adult song in a process not unlike language development in children Moreover the neural circuits supporting this behavior in songbirds bear anatomical and functional similarities to those in humans In adult humans the fiber tract connecting the auditory cortex and motor cortex dorsally is known to be involved in the repetition of spoken language This pathway is present already at birth and is taken to play a major role during language acquisition In songbirds detailed information exist concerning the interaction of auditory motor and cortical basal ganglia processing during song learning and present a rich substrate for comparative studies The scope of the Research Topic is to bring together contributions of researchers from different fields who investigate grammar processing in humans non human primates and songbirds with the aim to find answers to the question of what constitutes the neurobiological basis of grammar learning Open questions are Which brain networks are relevant for grammar learning Is there more than one dorsal pathway one from temporal cortex to motor cortex and one to Broca s area and if so what are their functions Has the ability to process sequences of a given hierarchical complexity evolved in different phylogenetic lines birds primates other vocal production learners such as bats Is the presence of a sensory to motor circuit in humans a precondition for development of a dorsal pathway between the temporal cortex and Broca s area What role do subcortical structures Basal Ganglia play in vocal and grammar learning
