Project Zero Frameworks for Early Childhood Education: Project Spectrum : early learning activities Howard Gardner, David Henry Feldman, Mara Krechevsky, Jie-Qi Chen, 1998-11-13 The groundbreaking work of Harvard University psychologist Howard Gardner on multiple intelligences and Tufts University psychologist David Henry Feldman on nonuniversal development is fast becoming the standard by which children's intelligence and cognitive development is understood In this landmark three volume set Mara Krechevsky and her colleagues at Project Zero make these insights available for both teachers and scholars alike This curriculum resource provides enriching activities in a wide variety of disciplines including mechanics and construction movement and music

Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM

Workgroups eAssessment: Planning, Implementing and Analysing Frameworks Rosalina Babo, Nilanjan Dey, Amira S. Ashour, 2020-12-11 This book was developed during a particular pandemic situation in the whole world which confined people to their homes Therefore there was a rise in the use of distance working and learning e learning which led to a very quick adoption of technology in order to guarantee different approaches to fulfil the same or better outcomes and ensure that people are connected This book provides a better understanding about the importance of teams assessment and collaborative work as well as the use of collaboration tools and online assessment techniques supported by technology Consequently the book is aimed at all institutions that seek new working environments namely higher education institutions companies and organizations sports teams and others Furthermore this book provides new approaches and systems to carry the knowledge and learning assessment The book gathers knowledge from several authors related to collaboration environments and tools as well as their insights on how technology can be applied to carry assessment processes The book seeks to provide knowledge on new technologies and different learning environments
