Ludopolitics Liam Mitchell, 2018-12-14 What can videogames tell us about the politics of contemporary technoculture and how are designers and players responding to its impositions To what extent do the technical features of videogames index our assumptions about what exists and what is denied that status And how can we use games to identify and shift those assumptions without ever putting down the controller Ludopolitics responds to these questions with a critique of one of the defining features of modern technology the fantasy of control Videogames promise players the opportunity to map and master worlds offering closed systems that are perfect in principle if not in practice In their numerical rule bound and goal oriented form they express assumptions about both the technological world and the world as such More importantly they can help us identify these assumptions and challenge them Games like Spec Ops The Line Braid Undertale and Bastion as well as play practices like speedrunning theorycrafting and myth making provide an aesthetic

means of mounting a political critique of the pursuit and valorization of technological control

Working in Public Nadia Asparouhova, 2020-08-04 An inside look at modern open source software development and its influence on our online social world Open source software in which developers publish code that anyone can use has long served as a bellwether for other online behavior In the late 1990s it provided an optimistic model for public collaboration but in the last 20 years it's shifted to solo operators who write and publish code that's consumed by millions In *Working in Public* Nadia Asparouhova takes an inside look at modern open source software development its evolution over the last two decades and its ramifications for an internet reorienting itself around individual creators Asparouhova who interviewed hundreds of developers while working to improve their experience at GitHub argues that modern open source offers us a model through which to understand the challenges faced by online creators She examines the trajectory of open source projects including The GitHub platform for hosting and development The structures roles incentives and relationships involved in open source projects The often overlooked maintenance required of its creators The costs of production that endure through an application's lifetime Asparouhova also scrutinizes the role of platforms like Twitter Facebook Twitch YouTube and Instagram which reduce infrastructure and distribution costs for creators but which massively increase the scope of interactions with their audience Open source communities are increasingly centered around the work of individual developers rather than teams Similarly if creators rather than discrete communities are going to become the epicenter of our online social systems we need to better understand how they work and we can do so by studying what happened to open source

Beyond Complicity Francine Banner, 2024-01-16 An ambitious study of our obsession with complicity that shows how we can all become good accomplices *Beyond Complicity* is a fascinating cultural diagnosis that identifies our obsession with complicity as a symptom of a deeply divided society The questions surrounding what it means to be legally complicit are the same ones we may ask ourselves as we evaluate our own and others responsibility for inherited and ongoing harms such as racism sexism and climate change What does it mean that someone knew they were contributing to wrongdoing How much involvement must a person have in order to be complicit At what point are we obligated to intervene Francine Banner ties together pop culture politics law and social movements to provide a framework for thinking about what we know intuitively that our society is defined by crisis risk and the quest to root out hazards at all costs Engaging with legal cases historical examples and contemporary case studies *Beyond Complicity* unfolds the complex role that complicity plays in US law and society today offering suggestions for how to shift focus away from blame and toward positive lasting systemic change
