Interpretation, Limitations and Future Direction

The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while student count shows an increasing trend for all topics as the subreddit grows, it is particularly for Topic 4 (Mental Health), becoming the most shared, as to identify the relative prevalence of each topic over time. Among the top topics, we find a mix of academic concerns (e.g., accommodation, university applications), social aspects (e.g., finding friends, loneliness), and personal well-being (e.g., mental health, finance). First, the prevalence of topics such as job, university choice and applications, accommodation and finance highlight the practical challenges that students face in their university journey. Secondly, students use such social media platforms as an avenue of seeking help and advice from other UK university students who have experienced similar concerns. These discussions not only provide valuable peer-to-peer support but also offer insights into the common struggles and decision-making processes of students.

However, it is important to acknowledge the limitations of this study. First, it only considers posts from the r/UKUni subreddit, which may not capture the full range of student experiences. Second, the data is self-reported and may be influenced by various factors, such as the timing of posts and the anonymity of the platform. Finally, the study does not account for the potential bias in the selection of topics for analysis. Despite these limitations, the findings provide a valuable snapshot of the concerns and experiences of UK university students as expressed on Reddit.
